

# DIN EN 12513:2011-05 (E)

## Founding - Abrasion resistant cast irons

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
Introduction .....		4
1 Scope .....		5
2 Normative references .....		5
3 Terms and definitions .....		5
4 Designation .....		6
5 Order information .....		6
6 Manufacture .....		6
6.1 General .....		6
6.2 Heat treatment .....		6
7 Requirements .....		7
7.1 Chemical composition .....		7
7.2 Brinell hardness .....		7
7.3 Microstructure .....		7
8 Sampling .....		7
8.1 Frequency of sampling for chemical analysis .....		7
8.2 Number and frequency of Brinell hardness tests .....		7
9 Test methods .....		8
9.1 Chemical analysis .....		8
9.2 Hardness test .....		8
9.3 Microstructure examination .....		8
10 Retests .....		9
10.1 Need for retests .....		9
10.2 Test validity .....		9
10.3 Nonconforming test results .....		9
10.4 Heat treatment of samples and castings .....		9
Annex A (informative) Heat treatment of abrasion resistant cast irons .....		12
Annex B (informative) Conversion between Brinell, Vickers and Rockwell C hardness .....		15
Annex C (informative) Relationship between relevant wall thickness and chemical composition for nickel-chromium cast irons .....		16
Annex D (informative) Typical microstructures of abrasion resistant cast irons .....		17
Annex E (informative) Comparison of abrasion resistant cast iron material designations according to EN 1560 and ISO/TR 15931 .....		18
Annex F (informative) Significant technical changes between this European Standard and its previous edition .....		19
Bibliography .....		20
