

ISO 26202:2019-10 (E)

Magnesium and magnesium alloys - Magnesium alloys for cast anodes

| Contents | | Page |
|-----------------------|---|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 1 |
| 4 | Designations | 1 |
| 4.1 | Material | 1 |
| 4.2 | Casting process | 1 |
| 5 | Requirements | 2 |
| 5.1 | General | 2 |
| 5.2 | Chemical composition | 2 |
| 6 | Testing | 5 |
| 6.1 | Sampling | 5 |
| 6.2 | Determination of the chemical composition | 5 |
| 6.3 | Electrochemical testing | 5 |
| 7 | Rounding of numbers | 5 |
| 8 | Packaging and surface protection | 5 |
| Annex A (normative) | Test method for the determination of the electrode potential of galvanic anodes | 6 |
| Annex B (normative) | Test method for the determination of the rate of mass loss of galvanic anodes | 8 |
| Annex C (informative) | Cross-references of grade designations of this document to other standard grades of magnesium alloy ingots for cast anodes and magnesium alloys for cast anodes | 11 |
| Bibliography | | 12 |
