

# DIN EN 16253:2013-09 (E)

## Air quality - Atmospheric measurements near ground with active Differential Optical Absorption Spectroscopy (DOAS) - Ambient air and diffuse emission measurements

---

| <b>Contents</b>   |  | <b>Page</b> |
|---|--|-------------|
| Foreword .....  |  | 3           |
| Introduction .....  |  | 4           |
| 1   | Scope .....  | 5           |
| 2   | Terms and definitions .....                                  | 5           |
| 3   | Symbols and abbreviations .....                              | 6           |
| 3.1   | Symbols .....  | 6           |
| 3.2   | Abbreviations .....  | 7           |
| 4   | Principle .....  | 7           |
| 4.1   | General .....  | 7           |
| 4.2   | Configuration of the measurement system .....                | 8           |
| 4.3   | The Beer-Lambert law .....                                   | 9           |
| 4.4   | Extended Beer-Lambert law .....                              | 10          |
| 4.5   | Differential optical density .....                           | 11          |
| 5   | Measurement procedure .....                                  | 15          |
| 5.1   | General .....  | 15          |
| 5.2   | Principle .....  | 16          |
| 6   | Measurement planning .....                                   | 19          |
| 6.1   | Definition of the measurement task .....                     | 19          |
| 6.2   | Selection of measurement parameters of the DOAS system ..... | 19          |
| 7   | Procedure in the field .....                                 | 20          |
| 7.1   | Installation and start-up of the instrument .....            | 20          |
| 7.2   | Verification of optical properties .....                     | 21          |
| 7.3   | Visibility .....   | 21          |
| 8   | Calibration methods .....                                    | 22          |
| 8.1   | General .....  | 22          |
| 8.2   | Gas cell calibration .....                                   | 22          |
| 8.3   | Calibration with complete spectral modelling .....           | 23          |
| 9   | Quality assurance .....                                      | 25          |
| 9.1   | Measurement procedure .....                                  | 25          |
| 9.2   | Apparent saturation of absorption bands .....                | 26          |
| Annex A (informative) Components of the measurement system .....              |  | 27          |
| Annex B (informative) Influence of scattered solar radiation .....            |  | 34          |
| Annex C (informative) Examples of implementations of the DOAS technique ..... |  | 36          |
| Annex D (informative) Performance characteristics .....                       |  | 46          |
| Annex E (informative) SI and common symbols and units in spectroscopy .....   |  | 51          |

|  |           |
|--|-----------|
| <b>Annex F (informative) Application examples .....</b>                            | <b>52</b> |
| <b>Annex G (informative) Example of sample form for a measurement record .....</b> | <b>80</b> |
| <b>Bibliography .....</b>  | <b>84</b> |
