DIN EN 16414:2014-08 (E)

Ambient air - Biomonitoring with mosses - Accumulation of atmospheric contaminants in mosses collected in situ: from the collecti on to the preparation of samples

Contents

Page

Foreword 3

0 Introduction 4
0.1 Biomonitoring and air quality 4
0.2 Biomonitoring and EU legislation 4
0.3 Biomonitoring with in situ mosses 5

1 Scope 6

2 Terms and definitions 6

3 Principle of the method 7

4 Equipment 7
4.1 Field equipment 7
4.2 Laboratory equipment 8

5 Sampling design 8
5.1 General 8
5.2 Monitoring regional patterns of deposition 8
5.3 Monitoring localized emission source 9

6 Sampling strategy 9
6.1 General 9
6.2 Moss species 10
6.3 Period of collection 10
6.4 Sampling unit characteristics 10

7 Sampling procedure 11
7.1 General 11
7.2 Moss sample 11
7.3 Sample collection 11
7.4 Packing 11

8 Sample preparation 12
8.1 Sample cleaning 12
8.2 Sample homogenization 12
8.3 Sample storage 12

9 Recommendations for sample analysis 12

10 Quality Control and Quality Assurance 12
10.1 General 12
10.2 Quality Control 13
10.2.1 Overall variability 13
10.2.2 Interspecies calibration 13
10.2.3 Storage of the samples 13
10.3 Quality Assurance 13

Annex A (informative) Example of a survey sheet 14

Annex B (informative) Example of the location of the sampling units near an emission source 15

Annex C (informative) List of main moss species used in published bioaccumulation studies 16

Bibliography 17
