Foreword 4

Introduction 5

1 Scope 6

2 Normative references 7

3 Terms and definitions 7

4 Symbols and abbreviations 10
4.1 General 10
4.2 Polychlorinated biphenyls 11

5 Principle of the measurement procedure 11

6 Device, materials and $^{13}C_{12}$-labelled standards 12
6.1 Device and materials 12
6.2 $^{13}C_{12}$-labelled standards 12

7 Safety measures 13

8 Measurement procedure 13
8.1 Sampling 13
8.2 Extraction 13
8.3 Clean-up 14
8.4 Final concentration of the sample extracts 15
8.5 Addition of recovery standards 15
8.6 Principle of identification and quantification 15
8.7 Calibration of the HRGC/HRMS 16
8.8 Quantification of HRGC/HRMS results 18
8.8.1 Quantification of the sample 18
8.8.2 Calculation of the recovery rates of the extraction standards 18
8.8.3 Calculation of the recovery rates of the sampling standards 19
8.9 Calculation of the measurement results 20
8.10 Analytical report 20

9 Method validation 21
9.1 General 21
9.2 Validation of sampling 22
9.3 Validation of Analytical Extraction and Clean-up 22
9.3.1 Extraction 22
9.3.2 Clean-up 22

10 Quality control requirements for the measurement 22
10.1 Use of a validated method 22
10.2 Use of $^{13}C_{12}$-labelled standards 23
10.3 Minimum requirements for sampling 23
10.4 Minimum requirements for extraction and clean-up 24
10.5 Minimum requirements for identification of PCB congeners 24
10.6 Minimum requirements for quantification 25

11 Quality assurance criteria for extraction/clean-up/quantification procedure blanks 26
11.1 Analytical blank 26
11.2 HRGC/HRMS blank 26

12 Performance characteristics **27**
12.1 General **27**
12.2 Results of the validation campaign **27**
13 Interferences (informative) **28**
Annex A (informative) **Toxicity and toxic equivalency** **30**
Annex B (informative) **Examples of extraction and clean-up procedures** **32**
B.1 Example for clean-up of PCB and the separation from PCDD/PCDFs **32**
B.1.1 General **32**
B.1.2 Chromatography column I **34**
B.1.3 Chromatography column II **34**
B.1.4 Additional clean-up I **34**
B.1.5 Additional clean-up II **35**
B.1.5.1 General **35**
B.1.5.2 Carbon Column **35**
B.1.5.3 Preparation **35**
B.1.6 Addition of the recovery standard **35**
B.1.7 HRGC/HRMS-analysis **35**
B.2 Description of extraction and clean-up procedures used in the validation campaign **41**
Annex C (informative) **Evaluation of the performance characteristics** **43**
C.1 General **43**
C.2 Interlaboratory comparison study of the analytical method **43**
C.3 Accuracy **44**
C.4 Limits of detection (LOD) and limits of quantification (LOQ) **46**
C.5 Recovery **48**
C.6 Breakthrough **49**
Annex D (informative) **Recommendations for measuring high concentrations of dioxin-like PCBs** **51**
Annex E (informative) **Possible interferences in dioxin-like PCB analysis** **52**
Annex F (informative) **Measurement of the marker PCBs 28, 52, 101, 138, 153, and 180 in addition to the 12 dioxin-like PCBs** **56**
Annex G (informative) **Measurement of hexachlorobenzene (HCB)** **59**
Annex H (informative) **Significant technical changes** **60**
Annex ZA (informative) **Relationship between this European Standard and the essential requirements of EU Directives** **61**
Bibliography **62**
