Page

Foreword iv

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and abbreviations 3
4.1 Symbols 3
4.2 Abbreviations 4

5 Principle 4

6 Apparatus and material 4
6.1 Equipment and materials for adhesive tape sampling and preparation 4
6.2 Equipment and material for analysis 5

7 Sampling 5
7.1 Measurement planning 5
7.2 Measurement objectives and sampling sites 6
7.3 Number of samples 7
7.4 Requirements on the sampled surface 8
7.5 Sampling procedure 8
7.6 Sampling record 9

8 Analysis (SEM) 10
8.1 Adjustment of the SEM 10
8.2 Procedure 10
8.3 Fibre classification by EDXA 13

9 Calculation and presentation of results 19

10 Record of analysis 20

11 Measurement uncertainty 20
11.1 General 20
11.2 Random sample related deviation 21
11.3 Deviations in analysis and weighting of the count results 21
11.4 Detection limit 21

12 Applications and instructions for use 22
12.1 General 22
12.2 Sample requirements 22
12.3 Summary of the results for multiple individual samples 23

Annex A (informative) Example of SEM structure counting form 24

Annex B (normative) Procedures for calibration and adjustment of the SEM 25

Annex C (informative) Random sample related deviation 26

Annex D (informative) Example: using the method in an indoor environment 30

Bibliography 32
