## Stationary source emissions - Sampling and determination of selenium compounds in flue gas

---

| <b>Contents</b>    |                                                                                       | <b>Page</b> |
|--------------------|---------------------------------------------------------------------------------------|-------------|
| Foreword .....     |                                                                                       | v           |
| Introduction ..... |                                                                                       | vi          |
| 1                  | Scope .....                                                                           | 1           |
| 2                  | Normative references .....                                                            | 1           |
| 3                  | Terms and definitions .....                                                           | 2           |
| 4                  | Symbols and abbreviated terms .....                                                   | 2           |
| 4.1                | Symbols .....                                                                         | 2           |
| 4.2                | Abbreviated terms .....                                                               | 4           |
| 5                  | Principle .....                                                                       | 4           |
| 6                  | Reagents .....                                                                        | 5           |
| 7                  | Apparatus .....                                                                       | 6           |
| 8                  | Sampling .....                                                                        | 9           |
| 8.1                | General .....                                                                         | 9           |
| 8.2                | Sampling position and sampling point .....                                            | 9           |
| 8.3                | Minimum sampling duration and minimum sample volume .....                             | 9           |
| 8.4                | Other measurements to be made prior to sampling .....                                 | 9           |
| 8.4.1              | Volumetric gas flow through duct at the sampling plane .....                          | 9           |
| 8.4.2              | Moisture content of gas .....                                                         | 9           |
| 8.4.3              | Oxygen content of gas .....                                                           | 10          |
| 8.5                | Assembly of sampling apparatus .....                                                  | 10          |
| 8.6                | Sampling .....                                                                        | 10          |
| 8.7                | Checking for leaks .....                                                              | 10          |
| 8.8                | Quality assurance .....                                                               | 10          |
| 8.9                | Sample recovery .....                                                                 | 11          |
| 8.9.1              | Sample recovery for gaseous selenium .....                                            | 11          |
| 8.9.2              | Sample recovery for particulate selenium .....                                        | 11          |
| 8.10               | Field blank .....                                                                     | 11          |
| 9                  | Sample preparation .....                                                              | 12          |
| 9.1                | General .....                                                                         | 12          |
| 9.2                | Sample preparation for analysis with hydride generation .....                         | 12          |
| 9.2.1              | Sample preparation for gaseous selenium analysis .....                                | 12          |
| 9.2.2              | Sample preparation for particulate selenium analysis .....                            | 12          |
| 9.3                | Sample preparation for analysis without hydride generation .....                      | 12          |
| 9.3.1              | Sample preparation for gaseous selenium analysis .....                                | 12          |
| 9.3.2              | Sample preparation for particulate selenium analysis .....                            | 12          |
| 10                 | Analytical procedure .....                                                            | 13          |
| 11                 | Expression of results .....                                                           | 13          |
| 11.1               | Calculation of the volume of dry flue gas sampled at sampling conditions, $V_m$ ..... | 13          |

|                       |                                                                                                                                                               |    |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 11.2                  | Calculation of the volume of dry flue gas sample normalized to standard temperature and pressure, $V_d$ .....                                                 | 14 |
| 11.3                  | Mass concentration of selenium expressed as elemental selenium in the flue gas on a dry basis at STP, $Se_{dry}$ .....                                        | 14 |
| 11.4                  | Mass concentration of selenium expressed as elemental selenium in the flue gas on a dry basis at STP and reference oxygen volume fraction, $Se_{dry,O}$ ..... | 16 |
| 11.5                  | Rate of mass discharge of selenium expressed as elemental selenium, $q_{m,Se}$ .....                                                                          | 17 |
| 11.6                  | Mass concentration of selenium expressed as elemental selenium in the flue gas on a wet basis at STP, $Se_{wet}$ .....                                        | 17 |
| 11.7                  | Mass concentration of selenium expressed as elemental selenium in the flue gas on a wet basis at STP and reference oxygen concentration, $Se_{wet,O}$ .....   | 17 |
| 12                    | Performance characteristics .....                                                                                                                             | 18 |
| 12.1                  | Detection limits .....                                                                                                                                        | 18 |
| 12.2                  | Evaluation of measurement uncertainty .....                                                                                                                   | 18 |
| 13                    | Test report .....                                                                                                                                             | 18 |
| Annex A (informative) | Results of evaluation of measurement uncertainties .....                                                                                                      | 20 |
