

# DIN EN 19694-3:2016-10 (E)

## Stationary source emissions - Determination of greenhouse gas (GHG) emissions in energy-intensive industries - Part 3: Cement industry

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		5
1	Scope .....	9
2	Normative references .....	9
3	Terms and definitions .....	9
4	Symbols and abbreviated terms .....	12
5	Determination of GHGs based on the mass balance method .....	13
5.1	General .....	13
5.2	Major GHG in cement .....	14
5.3	Determination based on mass balance .....	14
5.4	Determination by stack emission measurements .....	14
5.5	Gross and net emissions .....	14
6	System boundaries .....	21
6.1	General .....	21
6.2	Operational boundaries .....	21
6.3	Organizational boundaries .....	22
7	Direct GHG emissions and their determination .....	25
7.1	General .....	25
7.2	CO <sub>2</sub> from raw material calcinations .....	28
7.3	Reporting of CO <sub>2</sub> emissions from raw material calcination based on clinker output: summary of IPCC and CSI recommendations and default emission factor for clinker .....	37
7.4	Determining the FD calcination rate .....	38
7.5	Direct determination of the CO <sub>2</sub> emission factor of FD from analysis of CO <sub>2</sub> content .....	39
7.6	Cement specific issues for fuels .....	39
7.7	GHG from fuels for kilns .....	41
7.8	GHG from non-kiln fuels .....	41
7.9	GHG from the combustion of wastewater .....	42
7.10	Non-CO <sub>2</sub> GHG emissions from the cement industry .....	42
8	Energy indirect and other indirect GHG emissions and their determination .....	43
8.1	General .....	43
8.2	CO <sub>2</sub> from external electricity production .....	43
8.3	CO <sub>2</sub> from bought clinker .....	44
9	Baselines, acquisitions and disinvestments .....	44
10	Reporting .....	45
10.1	General .....	45
10.2	Corporate environmental reporting .....	45
10.3	Reporting periods .....	46
10.4	Performance indicators .....	47
11	Uncertainty of GHG inventories .....	53

11.1	Introduction to uncertainty assessment .....	53
11.2	Uncertainty of activity data .....	56
11.3	Uncertainties of fuel and material parameters .....	56
11.4	Uncertainties of continuous stack emission measurements .....	57
11.5	Evaluation of the overall uncertainty of a GHG inventory .....	58
11.6	Application of default values instead of analysing results .....	58
12	Considerations for applying this standard (verification procedure) .....	59
	Annex A (informative) Findings from the field tests (analytical interferences) .....	61
	Annex B (informative) Emission factors .....	65
	Annex C (informative) Uncertainty of activity data .....	67
	Annex D (informative) Overview on terms in a cement plant .....	73
	Bibliography .....	75
