

# DIN EN 14790:2017-05 (E)

## Stationary source emissions - Determination of the water vapour in ducts - Standard reference method

---

<b>Contents</b>		<b>Page</b>
European foreword.....		4
1	Scope.....	5
2	Normative references.....	5
3	Terms and definitions.....	6
4	Symbols and abbreviations.....	11
4.1	Symbols.....	11
4.2	Abbreviated terms.....	12
5	Principle.....	12
5.1	General.....	12
5.2	Adsorption or condensation/adsorption method.....	12
5.3	Temperature method.....	12
6	Description of the measuring system.....	13
6.1	General.....	13
6.2	Sampling probe.....	13
6.3	Filter housing.....	13
6.4	Particle filter.....	14
6.5	Trapping system.....	14
6.6	Cooling system (optional).....	14
6.7	Sample gas pump.....	14
6.8	Gas volume meter.....	14
6.9	Barometer.....	15
6.10	Balance.....	15
6.11	Temperature measurement.....	15
7	Performance characteristics of the SRM.....	15
8	Field operation.....	16
8.1	Measurement planning.....	16
8.2	Sampling strategy.....	17
8.2.1	General.....	17
8.2.2	Measurement section and measurement plane.....	17
8.2.3	Minimum number and location of measurement points.....	17
8.2.4	Measurement ports and working platform.....	17
8.3	Assembling the equipment.....	17
8.4	Leak test.....	18
8.5	Performing sampling.....	18
8.5.1	Introduction of the sampling probe in the duct.....	18
8.5.2	Sampling.....	18
8.6	Repeatability of the weighing.....	19
8.7	Procedure for gas streams saturated with water (droplets present).....	19
9	Water vapour determination.....	19
10	Equivalence of an alternative method.....	21
11	Measurement report.....	21

<b>Annex A (informative) Validation of the method in the field.....</b>	<b>22</b>
<b>A.1 General .....</b>	<b>22</b>
<b>A.2 Characteristics of installations .....</b>	<b>22</b>
<b>A.3 Repeatability and reproducibility in the field.....</b>	<b>23</b>
<b>A.3.1 General .....</b>	<b>23</b>
<b>A.3.2 Repeatability .....</b>	<b>24</b>
<b>A.3.3 Reproducibility.....</b>	<b>25</b>
<b>Annex B (normative) Determination of water vapour concentration for water saturated gas, at <math>p_{ref} = 101,325</math> kPa.....</b>	<b>26</b>
<b>Annex C (informative) Type of sampling equipment.....</b>	<b>30</b>
<b>Annex D (informative) Example of assessment of compliance of standard reference method for water vapour with given uncertainty requirements .....</b>	<b>31</b>
<b>D.1 General .....</b>	<b>31</b>
<b>D.2 Elements required for the uncertainty determinations.....</b>	<b>31</b>
<b>D.3 Example of an uncertainty calculation.....</b>	<b>31</b>
<b>D.3.1 Specific conditions in the field .....</b>	<b>31</b>
<b>D.3.2 Performance characteristics .....</b>	<b>32</b>
<b>D.3.3 Model equation and application of the rule of the uncertainty propagation .....</b>	<b>34</b>
<b>D.3.3.1 Water vapour content.....</b>	<b>34</b>
<b>D.3.3.2 Effect of the collection efficiency.....</b>	<b>35</b>
<b>D.3.3.3 Calculation of the combined uncertainty of the water vapour content taking into account the collection efficiency .....</b>	<b>35</b>
<b>D.3.3.4 Calculation of sensitivity coefficients.....</b>	<b>36</b>
<b>D.3.3.5 Calculation of the standard uncertainty of the collection efficiency .....</b>	<b>36</b>
<b>D.3.3.6 Calculation of the standard uncertainty of measured dry gas volume corrected to standard conditions.....</b>	<b>37</b>
<b>D.3.3.7 Calculation of the combined uncertainty of the water vapour content .....</b>	<b>38</b>
<b>D.3.3.8 Results of standard uncertainties calculations.....</b>	<b>38</b>
<b>D.3.4 Estimation of the combined uncertainty.....</b>	<b>41</b>
<b>Annex E (informative) Significant technical changes .....</b>	<b>42</b>
