

DIN ISO 28902-2:2018-08 (E)

Air quality - Environmental meteorology - Part 2: Ground-based remote sensing of wind by heterodyne pulsed Doppler lidar (I SO 28902-2:2017)

Contents		Page
National foreword		3
National Annex NA (informative) Bibliography		4
Foreword		5
Introduction		6
1	Scope	7
2	Normative references	7
3	Terms and definitions	7
4	Fundamentals of heterodyne pulsed Doppler lidar	10
4.1	Overview.....	10
4.2	Heterodyne detection.....	11
4.3	Spectral analysis.....	13
4.4	Target variables.....	16
4.5	Sources of noise and uncertainties.....	16
4.5.1	Local oscillator shot noise.....	16
4.5.2	Detector noise.....	17
4.5.3	Relative intensity noise (RIN).....	17
4.5.4	Speckles.....	17
4.5.5	Laser frequency.....	17
4.6	Range assignment.....	17
4.7	Known limitations.....	17
5	System specifications and tests	18
5.1	System specifications.....	18
5.1.1	Transmitter characteristics.....	18
5.1.2	Transmitter/receiver characteristics.....	19
5.1.3	Signal sampling parameters.....	19
5.1.4	Pointing system characteristics.....	20
5.2	Relationship between system characteristics and performance.....	21
5.2.1	Figure of merit.....	21
5.2.2	Time-bandwidth trade-offs.....	22
5.3	Precision and availability of measurements.....	23
5.3.1	Radial velocity measurement accuracy.....	23
5.3.2	Data availability.....	23
5.3.3	Maximum operational range.....	23
5.4	Testing procedures.....	24
5.4.1	General.....	24
5.4.2	Radial velocity measurement validation.....	24
5.4.3	Assessment of accuracy by intercomparison with other instrumentation.....	26
5.4.4	Maximum operational range validation.....	27
6	Measurement planning and installation instructions	29
6.1	Site requirements.....	29
6.2	Limiting conditions for general operation.....	29
6.3	Maintenance and operational test.....	30
6.3.1	General.....	30
6.3.2	Maintenance.....	30
6.3.3	Operational test.....	30
6.3.4	Uncertainty.....	30
Annex A (informative) Continuous-wave Doppler wind lidar		32
Annex B (informative) Retrieval of the wind vector		33
Annex C (informative) Applications		38
Annex D (informative) Typical application ranges and corresponding requirements		42
Bibliography		44
