ISO 16000-34:2018 (E)

Indoor air — Part 34: Strategies for the measurement of airborne particles

Contents

	Fore	eword
	Intro	duction
1	Sco	pe e
2	Norr	native references
3	Tern	ns and definitions
4	Orig	in, properties and health implications of airborne particles
	4.1 4.2	Origin and properties Health implications
5	Sou	rces of indoor particulate matter and particle dynamics indoors
	5.1 5.2 5.2.1 5.2.2	General Sources of indoor particulate matter Typical indoor sources Influence of the premises
	5.2.3 5.3 5.3.1 5.3.2 5.3.3 5.3.4	Particle size range generated by typical sources Particle dynamics indoors Major particle sinks Variations of the particle spectrum Effect of air conditioning Conditions of room use
6		surement methods for airborne particles indoors
	6.1 6.2 6.2.1 6.2.2 6.2.2.1 6.2.2.2 6.2.2.3 6.2.3	General Established method description General Cyclone Principle Capabilities of the method Limits of the method Impactors (impactor – cascade impactor – LPI – MOI)
	6.2.3.1 6.2.3.2 6.2.3.3 6.2.4 6.2.4.1 6.2.4.2	Principle Capabilities of the method Limits of the method Differential mobility analyser (DMA) Principle Capabilities of the method
	6.2.4.3 6.2.5 6.2.5.1 6.2.5.2 6.2.5.3 6.2.6	Limits of the method Aerosol mass spectrometer (AMS) Principle Capabilities of the method Limits of the method Aerosol mass monitor (AMM)
	6.2.6.1 6.2.6.2 6.2.6.3 6.2.7 6.2.7.1 6.2.7.2	Principle Capabilities of the method Limits of the method Oscillating microbalance (OMB) Principle Capabilities of the method
	6.2.7.3 6.2.8	Limits of the method Beta radiation attenuation (BRA) monitor

6.2.8.1	Principle
6.2.8.2	Capabilities of the method
6.2.8.3	Limits of the method
6.2.9	Microscopy (OM - SEM - TEM)
6.2.9.1	Principle
6.2.9.2	Capabilities of the method
6.2.9.3	Limits of the method
6.2.10	Light scattering aerosol spectrometer (LSAS)
6.2.10.1	Principle
6.2.10.2	Capabilities of the method
6.2.10.3	Limits of the method
6.2.11	Time-of-flight spectrometer (TOF-AS)
6.2.11.1	Principle
6.2.11.2	Capabilities of the method
	Limits of the method
6.2.12	Condensation particle counter (CPC – UF CPC – CPC with SES – CPC photometric
00404	mode)
6.2.12.1 6.2.12.2	Principle Canabilities of the method
6.2.12.2	Capabilities of the method Limits of the method
6.2.13	Faraday cup aerosol electrometer (FCAE)
6.2.13.1	Principle
6.2.13.1	Capabilities of the method
6.2.13.3	Limits of the method
6.2.14	Fast response aerosol spectrometer (FRAS)
6.2.14.1	Principle
6.2.14.2	Capabilities of the method
6.2.14.3	Limits of the method
6.2.15	Low pressure impactor with electric detection (LPI+E)
6.2.15.1	Principle
6.2.15.2	Capabilities of the method
6.2.15.3	Limits of the method
Genei	ral sampling recommendations
7.1 7.2	Instrumentation and sampling system Measurement location
7.2	
	Moscuroment time and duration
74	Measurement time and duration Estimated concentration scale (minimum and maximum accuracy)
7.4 7.5	Estimated concentration scale (minimum and maximum accuracy)
7.5	Estimated concentration scale (minimum and maximum accuracy) Background concentration
7.5 7.6	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality
7.5	Estimated concentration scale (minimum and maximum accuracy) Background concentration
7.5 7.6 7.7 7.8	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself
7.5 7.6 7.7 7.8 Measo	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors
7.5 7.6 7.7 7.8 Meass	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General
7.5 7.6 7.7 7.8 Measo	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic
7.5 7.6 7.7 7.8 Meast 8.1 8.2	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information
7.5 7.6 7.7 7.8 Measu 8.1 8.2	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General
7.5 7.6 7.7 7.8 Measu 8.1 8.2 8.2.1 8.2.2	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement
7.5 7.6 7.7 7.8 Measu 8.1 8.2 8.2.1 8.2.2 8.2.3	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3 8.4	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy Preliminary measurements
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3 8.4 8.5	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3 8.4	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy Preliminary measurements Measurement procedures General
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3 8.4 8.5 8.5.1	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy Preliminary measurements Measurement procedures
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3 8.4 8.5 8.5.1 8.5.2	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy Preliminary measurements Measurement procedures General Procedure for the determination of the background
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3 8.4 8.5 8.5.1 8.5.2 8.5.2	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy Preliminary measurements Measurement procedures General Procedure for the determination of the background Instrumentation and measurands
7.5 7.6 7.7 7.8 Mease 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3 8.4 8.5 8.5.1 8.5.1 8.5.2 8.5.2.1	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy Preliminary measurements Measurement procedures General Procedure for the determination of the background Instrumentation and measurands Measurement procedure
7.5 7.6 7.7 7.8 Measu 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3 8.4 8.5 8.5.1 8.5.2 8.5.2.1 8.5.2.2 8.5.2.1	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy Preliminary measurements Measurement procedures General Procedure for the determination of the background Instrumentation and measurands Measurement procedure Measurement planning and setup
7.5 7.6 7.7 7.8 Measu 8.1 8.2 8.2.1 8.2.2 8.2.3 8.2.4 8.2.5 8.3 8.4 8.5 8.5.1 8.5.2 8.5.2.1 8.5.2.2 8.5.2.1	Estimated concentration scale (minimum and maximum accuracy) Background concentration Impact of outdoor air quality Impact of room conditions Impact of the measurement itself urement strategy for determining airborne particles indoors General Preliminary work — Definition of the measurement objective and list of basic information General Statement on the purpose of the measurement List of main expected sources Temporal effects Description of the indoor compartment Visual room inspection — Definition of the measurement planning and strategy Preliminary measurements Measurement procedures General Procedure for the determination of the background Instrumentation and measurands Measurement planning and setup Evaluation

	8.5.3.3	Measurement planning and setup	
	8.5.3.4	Evaluation	
	8.5.4	Procedure for the identification of main sources present in a room	
	8.5.4.1	General	
	8.5.4.2	Instrumentation and measurands	
	8.5.4.3	Measurement procedure	
	8.5.4.4	Measurement planning and setup	
	8.5.4.5	Evaluation	
	8.5.5	Procedure for the measurement of the average and the time-resolved emission of a specific source	
	8.5.5.1	General	
	8.5.5.2	Instrumentation and measurands	
	8.5.5.3	Measurement procedure	
	8.5.5.4	Measurement planning and setup	
	8.5.5.5	Evaluation	
	8.5.6	Procedure for the estimation of the efficiency of an abatement techniques (i.e. filtration	
		by air conditioning system	
	8.5.6.1	General	
	8.5.6.2	Instrumentation and measurands	
	8.5.6.3	Measurement procedure	
	8.5.6.4	Measurement planning and setup	
	8.5.6.5	Evaluation	
9	Unce	certainty evaluation	
10	Eval	Evaluation and reporting of results	
11	Docı	umentation
