

# DIN EN 17255-1:2019-10 (E)

## Stationary source emissions - Data acquisition and handling systems - Part 1: Specification of requirements for the handling and reporting of data

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	6
4	Symbols and abbreviations .....	12
4.1	Symbols .....	12
4.2	Abbreviations .....	13
5	Principles .....	14
5.1	General .....	14
5.2	Outline of approach .....	15
6	Input data .....	16
6.1	Emission data .....	16
6.2	Peripheral data .....	16
6.3	Flow data .....	16
6.4	Plant process data .....	16
6.5	Manually entered data .....	16
7	First level data .....	16
7.1	General .....	16
7.2	FLD values .....	17
7.3	Data outside the measurement range .....	17
7.4	Status information associated with FLD .....	17
7.4.1	AMS status .....	17
7.4.2	Status of peripheral data .....	18
7.4.3	Plant information .....	18
7.5	Calculation of standardized first level data .....	18
7.6	QAL3 .....	19
7.7	Flow data .....	19
8	Calculation of reported data .....	20
8.1	General .....	20
8.2	Averages .....	20
8.2.1	General .....	20
8.2.2	Block Averages .....	20
8.2.3	Rolling Averages .....	21
8.3	Calculation of short-term averages .....	21
8.4	Status information associated with STA .....	21
8.4.1	Status of the data .....	21
8.4.2	Plant operation mode .....	22
8.5	Validity of the STA .....	22
8.6	STA of peripheral data .....	23
8.6.1	Peripheral data from AMS .....	23
8.6.2	Missing peripheral values .....	24

8.7	Calculation of standardized short-term averages .....	24
8.8	Calculation of SSTA for a common stack .....	24
<b>DIN EN 17255-1:2019-10 EN 17255-1:2019 (E) 8.9 Calculation of mass emission for each STA period</b>		
	.....	25
8.10	Calibration range check .....	26
8.11	Validated short-term averages .....	26
8.12	Long-term averages .....	26
8.13	Percentage of values complying with ELV .....	26
8.14	Mass emissions .....	27
8.15	Invalidated days .....	27
9	Reporting and summary statistics .....	27
9.1	DAHS operational requirements .....	27
9.2	Reports .....	27
<b>Annex A (informative) Data flow charts .....</b>		
		29
A.1	General .....	29
A.2	Formation of first level data .....	29
A.3	Determination of short-term averages .....	30
A.4	Determination of standardized short-term averages .....	31
A.5	Determination of validated short-term averages .....	32
A.6	Determination of short-term averages of mass emissions .....	32
A.7	Determination of long-term averages .....	33
<b>Annex B (normative) Conversion procedures .....</b>		
		34
B.1	General .....	34
B.2	Conversion of volume fraction to mass concentration .....	34
B.3	Conversion of volume to standard conditions .....	34
B.4	Conversion of mass concentration with peripheral parameters .....	35
B.5	Conversion of waste gas volume to standard conditions .....	36
B.6	Calculation of volumetric gas flow .....	36
B.7	Calculation of mass flow .....	37
B.8	Calculation of NO <sub>x</sub> as NO <sub>2</sub> equivalent .....	37
<b>Annex C (informative) Determining capping levels .....</b>		
		38
C.1	Capping values .....	38
C.2	Setting the level for capping .....	38
<b>Annex D (normative) Calculation of exceedance for CO over a rolling 24 h period .....</b>		
		39
<b>Bibliography .....</b>
