

# DIN EN 17255-1:2019-10 (E)

## Stationary source emissions - Data acquisition and handling systems - Part 1: Specification of requirements for the handling and reporting of data

---

| Contents   | Page |
|--|------|
| European foreword .....                                | 4    |
| Introduction .....                                     | 5    |
| 1 Scope .....  | 6    |
| 2 Normative references .....                           | 6    |
| 3 Terms and definitions .....                          | 6    |
| 4 Symbols and abbreviations .....                      | 12   |
| 4.1 Symbols .....                                      | 12   |
| 4.2 Abbreviations .....                                | 13   |
| 5 Principles .....                                     | 14   |
| 5.1 General .....                                      | 14   |
| 5.2 Outline of approach .....                          | 15   |
| 6 Input data .....                                     | 16   |
| 6.1 Emission data .....                                | 16   |
| 6.2 Peripheral data .....                              | 16   |
| 6.3 Flow data .....                                    | 16   |
| 6.4 Plant process data .....                           | 16   |
| 6.5 Manually entered data .....                        | 16   |
| 7 First level data .....                               | 16   |
| 7.1 General .....                                      | 16   |
| 7.2 FLD values .....                                   | 17   |
| 7.3 Data outside the measurement range .....           | 17   |
| 7.4 Status information associated with FLD .....       | 17   |
| 7.4.1 AMS status .....                                 | 17   |
| 7.4.2 Status of peripheral data .....                  | 18   |
| 7.4.3 Plant information .....                          | 18   |
| 7.5 Calculation of standardized first level data ..... | 18   |
| 7.6 QAL3 .....   | 19   |
| 7.7 Flow data .....                                    | 19   |
| 8 Calculation of reported data .....                   | 20   |
| 8.1 General .....                                      | 20   |
| 8.2 Averages .....                                     | 20   |
| 8.2.1 General .....                                    | 20   |
| 8.2.2 Block Averages .....                             | 20   |
| 8.2.3 Rolling Averages .....                           | 21   |
| 8.3 Calculation of short-term averages .....           | 21   |
| 8.4 Status information associated with STA .....       | 21   |
| 8.4.1 Status of the data .....                         | 21   |
| 8.4.2 Plant operation mode .....                       | 22   |
| 8.5 Validity of the STA .....                          | 22   |
| 8.6 STA of peripheral data .....                       | 23   |
| 8.6.1 Peripheral data from AMS .....                   | 23   |
| 8.6.2 Missing peripheral values .....                  | 24   |

|  |  |    |
|--|--|----|
| 8.7  | <b>Calculation of standardized short-term averages .....</b>             | 24 |
| 8.8  | <b>Calculation of SSTA for a common stack .....</b>                      | 24 |
| <b>DIN EN 17255-1:2019-10 EN 17255-1:2019 (E) 8.9 Calculation of mass emission for each STA period .....</b> |  | 25 |
| 8.10   | <b>Calibration range check .....</b>                                     | 26 |
| 8.11   | <b>Validated short-term averages .....</b>                               | 26 |
| 8.12   | <b>Long-term averages .....</b>  | 26 |
| 8.13   | <b>Percentage of values complying with ELV .....</b>                     | 26 |
| 8.14   | <b>Mass emissions .....</b>  | 27 |
| 8.15   | <b>Invalidated days .....</b>  | 27 |
| 9  | <b>Reporting and summary statistics .....</b>                            | 27 |
| 9.1  | <b>DAHS operational requirements .....</b>                               | 27 |
| 9.2  | <b>Reports .....</b>   | 27 |
| <b>Annex A (informative) Data flow charts .....</b>  |  | 29 |
| A.1  | <b>General .....</b>   | 29 |
| A.2  | <b>Formation of first level data .....</b>                               | 29 |
| A.3  | <b>Determination of short-term averages .....</b>                        | 30 |
| A.4  | <b>Determination of standardized short-term averages .....</b>           | 31 |
| A.5  | <b>Determination of validated short-term averages .....</b>              | 32 |
| A.6  | <b>Determination of short-term averages of mass emissions .....</b>      | 32 |
| A.7  | <b>Determination of long-term averages .....</b>                         | 33 |
| <b>Annex B (normative) Conversion procedures .....</b>   |  | 34 |
| B.1  | <b>General .....</b>   | 34 |
| B.2  | <b>Conversion of volume fraction to mass concentration .....</b>         | 34 |
| B.3  | <b>Conversion of volume to standard conditions .....</b>                 | 34 |
| B.4  | <b>Conversion of mass concentration with peripheral parameters .....</b> | 35 |
| B.5  | <b>Conversion of waste gas volume to standard conditions .....</b>       | 36 |
| B.6  | <b>Calculation of volumetric gas flow .....</b>                          | 36 |
| B.7  | <b>Calculation of mass flow .....</b>                                    | 37 |
| B.8  | <b>Calculation of NOx as NO2 equivalent .....</b>                        | 37 |
| <b>Annex C (informative) Determining capping levels .....</b>  |  | 38 |
| C.1  | <b>Capping values .....</b>  | 38 |
| C.2  | <b>Setting the level for capping .....</b>                               | 38 |
| <b>Annex D (normative) Calculation of exceedance for CO over a rolling 24 h period .....</b>                 |  | 39 |
| <b>Bibliography .....</b>  |  | 40 |
