National foreword 3

Foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Principle 8

5 Apparatus and materials 8
5.1 Apparatus 8
5.2 Materials 11
5.2.1 Test bacteria 11
5.2.2 Culture media and reagents 11

6 Preparation of the stock cultures and working cultures of the test bacteria 12
6.1 Preparation and maintenance of stock culture 12
6.2 Preparation and maintenance of working cultures of the test bacteria on agar plates 12
6.3 Preparation of working culture suspensions 12

7 Procedures 12
7.1 General 12
7.2 Step 1 -- Measurement of the concentration of culturable test bacteria, ci, without operating the air purifier 13
7.2.1 General 13
7.2.2 Preparation of the air purifier and the test chamber 13
7.2.3 Measurement of bacterial background concentration in the test chamber 13
7.2.4 Nebulizing test bacterial suspension 13
7.2.5 Measurement of the initial concentration of culturable bacteria inside the test chamber after nebulizing 14
7.2.6 Measurement of the concentration of culturable bacteria inside the test chamber after a defined time 14
7.2.7 Post-test actions 14
7.3 Step 2 -- Measurement of the concentration of culturable test bacteria, ct, after operating the air purifier 14

8 Calculation and expression of results 15
8.1 Calculation of the concentration of airborne culturable bacteria 15
8.2 Conditions for a valid test 15
8.3 Reduction rate of bacteria 15

9 Test report 16

10 Quality assurance 16

Annex A (informative) Test chamber 17

Annex B (informative) Natural decay rate according to the operating mode of air purifier 20

Annex C (informative) Homogeneity of airborne culturable bacteria in the test chamber 22

Bibliography 23
