DIN EN 17255-2:2020-07 (E)

Stationary source emissions - Data acquisition and handling systems - Part 2: Specification of requirements on data acquisition and handling systems

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Symbols and abbreviations 8

5 Principles 8

6 Performance requirements 9
6.1 General 9
6.2 Data acquisition 10
6.2.1 Overview 10
6.2.2 Interfaces 10
6.2.3 Manual data input 11
6.2.4 Remote data logger unit 11
6.3 Input data processing 11
6.3.1 Validity of input data 11
6.3.2 First level data (FLD) 12
6.4 Reported data 12
6.4.1 General 12
6.4.2 Warnings, alarms and violations 12
6.5 Reports 12
6.5.1 General 12
6.5.2 Emission reports 13
6.5.3 System reports 13
6.6 Data storage 13
6.6.1 General 13
6.6.2 Time stamping 13
6.6.3 Storage of FLD 13
6.6.4 Storage of STA 13
6.6.5 Storage of standardized STA (SSTA) 14
6.6.6 Storage of validated STA (VSTA) 14
6.6.7 Storage of QAL3 data 14
6.6.8 Storage of warnings, alarms and violations 14
6.6.9 Storage of the event-log and configuration parameters 14
6.7 System functions 14
6.7.1 Event log 14
6.7.2 Configuration 14
6.7.3 Export of data 14
6.7.4 Test mode 15
6.8 Data integrity 15
6.8.1 DAHS availability 15
6.8.2 Tamper-proof data transfer and handling 15
6.8.3 Preventing loss of data 15
6.8.4 Data back-up 15

6.8.5 DAHS identification 16
6.8.6 Time management 16
6.9 Documentation 16

Annex A(informative) Example list of configuration parameters 17

A.1 Measurement channel configuration 17
A.2 Data processing configuration 18
A.3 Data storage configuration 19
A.4 Report configuration 19
