|-------------------------|---|-------------|
| European foreword ..... |   | 5           |
| Introduction .....      |   | 7           |
| 1                       | Scope .....   | 10          |
| 2                       | Normative references .....  | 10          |
| 3                       | Terms and definitions .....   | 10          |
| 4                       | Symbols and abbreviations .....   | 18          |
| 5                       | General requirements .....  | 20          |
| 5.1                     | Application of performance criteria .....   | 20          |
| 5.2                     | Ranges to be tested .....   | 21          |
| 5.2.1                   | Certification range .....   | 21          |
| 5.2.2                   | Supplementary ranges .....  | 21          |
| 5.2.3                   | Lower limit of ranges .....   | 22          |
| 5.2.4                   | Expression of performance criteria with respect to ranges .....                                     | 22          |
| 5.2.5                   | Ranges of optical in situ P-AMS with variable optical length .....                                  | 22          |
| 5.3                     | Performance testing of P-AMS based on certified AMS previously tested according to EN 15267-3 ..... | 22          |
| 5.4                     | Equivalence with the SRM .....  | 22          |
| 5.5                     | Manufacturing consistency and changes to P-AMS design .....   | 22          |
| 5.6                     | Qualifications of testing laboratories .....  | 22          |
| 6                       | Common performance criteria for the laboratory test .....   | 23          |
| 6.1                     | P-AMS for testing .....   | 23          |
| 6.2                     | Evidence of compliance of legal requirements .....  | 23          |
| 6.3                     | Output ranges and zero-point .....  | 23          |
| 6.4                     | Operational status signals .....  | 23          |
| 6.5                     | Degrees of protection provided by enclosures .....  | 23          |
| 6.6                     | Response time .....   | 23          |
| 6.7                     | Repeatability standard deviation at zero point .....  | 23          |
| 6.8                     | Repeatability standard deviation at span point .....  | 24          |
| 6.9                     | Lack of fit .....   | 24          |
| 6.10                    | Short-term drift at zero point and at span point .....  | 24          |
| 6.11                    | Set-up time after transport and influence of ambient temperature .....                              | 24          |
| 6.12                    | Influence of supply voltage variations .....  | 24          |
| 6.13                    | Influence of vibration .....  | 24          |
| 6.14                    | Influence of sample gas pressure for in situ P-AMS .....  | 24          |
| 6.15                    | Influence of sample gas flow for extractive P-AMS .....   | 25          |
| 6.16                    | Cross-sensitivity .....   | 25          |
| 6.17                    | Converter efficiency for P-AMS measuring NO <sub>x</sub> .....                                      | 25          |
| 6.18                    | Converter efficiency for P-AMS measuring Hg .....   | 25          |
| 6.19                    | Response factors for P-AMS measuring TOC .....  | 25          |
| 6.20                    | Influences on P-AMS with in-stack sampling chamber .....  | 25          |
| 6.21                    | Influences related to storage and transportation .....  | 26          |

|   |   |    |
|---|---|----|
| 7   | Common performance criteria for the field test .....                        | 26 |
| 7.1   | Response time .....   | 26 |
| 7.2   | Short-term drift at zero point and at span point .....                      | 26 |
| 7.3   | Reproducibility .....   | 26 |
| 8   | Specific performance criteria for measured components .....                 | 26 |
| 8.1   | General .....   | 26 |
| 8.2   | P-AMS measuring gaseous measured components .....                           | 26 |
| 8.2.1   | Performance criteria .....  | 26 |
| 8.2.2   | P-AMS measuring TOC .....   | 28 |
| 8.2.3   | P-AMS measuring Hg .....  | 29 |
| 8.3   | P-AMS measuring particulate matter .....                                    | 29 |
| 9   | General test requirements .....   | 30 |
| 10  | Test procedures for the laboratory test .....                               | 32 |
| 10.1  | P-AMS for testing .....   | 32 |
| 10.2  | Evidence of compliance of legal requirements .....                          | 32 |
| 10.3  | Output ranges and zero point .....  | 32 |
| 10.4  | Operational status signals .....  | 32 |
| 10.5  | Degrees of protection provided by enclosures .....                          | 32 |
| 10.6  | Response time .....   | 33 |
| 10.7  | Repeatability standard deviation at zero point .....                        | 34 |
| 10.8  | Repeatability standard deviation at span point .....                        | 35 |
| 10.9  | Lack of fit .....   | 35 |
| 10.10   | Short-term drift at zero point and at span point .....                      | 37 |
| 10.11   | Set-up time after transportation and influence of ambient temperature ..... | 37 |
| 10.12   | Influence of supply voltage variations .....                                | 38 |
| 10.13   | Influence of vibration .....  | 39 |
| 10.14   | Influence of sample gas pressure for in situ P-AMS .....                    | 39 |
| 10.15   | Influence of sample gas flow for extractive P-AMS .....                     | 40 |
| 10.16   | Cross-sensitivity .....   | 41 |
| 10.17   | Converter efficiency for P-AMS measuring NOX .....                          | 42 |
| 10.18   | Converter efficiency for P-AMS measuring Hg .....                           | 43 |
| 10.19   | Response factors for P-AMS measuring TOC .....                              | 43 |
| 10.20   | Influences on P-AMS with in-stack sampling chamber .....                    | 44 |
| 10.21   | Influences related to storage and transportation .....                      | 44 |
| 11  | Requirements for the field test .....                                       | 44 |
| 12  | Common test procedures for the field test .....                             | 45 |
| 12.1  | Response time .....   | 45 |
| 12.2  | Short-term drift at zero point and at span point .....                      | 45 |
| 12.3  | Reproducibility .....   | 46 |
| 13  | Equivalence with the SRM .....  | 46 |
| 14  | Measurement uncertainty .....   | 47 |
| 15  | Test report .....   | 47 |
| Annex A (informative) European standard reference methods (SRM) and reference methods (RM) .. |   | 49 |
| Annex B (normative) Minimum requirements for a test bench .....                               |   | 50 |
| Annex C (normative) Interferents .....  |   | 51 |
| Annex D (informative) Example for the determination of the expanded uncertainty .....         |   | 52 |
| D.1   | Determination of uncertainty contributions .....                            | 52 |
| D.2   | Elements required for the uncertainty determinations .....                  | 52 |
| D.3   | Example of an uncertainty calculation for a P-AMS measuring CO .....        | 54 |

|     |   |           |
|-----|---|-----------|
| D.4 | Determination of uncertainty contributions by use of sensitivity coefficients ..... | 57        |
|     | <b>Annex E (normative) Test of linearity .....</b>                                  | <b>58</b> |
| E.1 | Description of the test procedure .....   | 58        |
| E.2 | Establishment of the regression line .....  | 58        |
| E.3 | Calculation of the residuals of the average concentrations .....                    | 59        |
|     | <b>Annex F (informative) Elements of a performance test report .....</b>            | <b>60</b> |
|     | <b>Bibliography .....</b>   | <b>63</b> |
