DIN ISO 16000-42:2025-02 (E)

Indoor air - Part 42: Measurement of the particle number concentration by condensation particle counters (ISO 16000-42:2023)

Contents

Page

National foreword ... **4**

National Annex NA (informative) **Bibliography** ... **7**

Foreword ... **8**

Introduction ... **9**

1 Scope ... **10**

2 Normative references ... **10**

3 Terms and definitions ... **10**

4 Abbreviated terms ... **12**

5 Sources of airborne particles ... **13**
5.1 General ... 13
5.2 Combustion of organic material ... 14
5.3 Smoking ... 14
5.4 Cooking ... 14
5.5 Particle formation — Formation of secondary organic aerosol ... 14
5.6 Outdoor air ... 14
5.7 Other sources ... 14

6 Dynamics of ultrafine particles indoors ... **15**
6.1 General ... 15
6.2 Infiltration and exfiltration ... 16
6.3 Deposition ... 16
6.4 Particle formation, phase transition and coagulation ... 16

7 Principle of measurement ... **17**
7.1 General ... 17
7.2 Working fluid ... 17
7.3 Minimal detection size ... 19
7.3.1 General ... 19
7.3.2 Optical detection after enlargement ... 19
7.3.3 Particle size distribution ... 20
7.4 CPC minimal requirement ... 20
7.5 General sampling requirements and recommendations ... 22

8 Measurement strategy ... **22**
8.1 General ... 22
8.2 Average room concentration ... 23
8.2.1 General ... 23
8.2.2 Resting state without activity ... 24
8.2.3 Resting state with equipment activity ... 24
8.2.4 Active state ... 24
8.3 Source investigation/identification ... 24
8.4 Infiltration from outdoor or connecting rooms ... 25
8.5 Measurement in vehicle cabins ... 26
8.6 Success of control and mitigation measures ... 26

9 Quality assurance and uncertainty evaluation ... **26**
9.1 General ... 26

9.2 Instrument parameters 27
9.3 CPC's settings check 27
9.4 Performance check, zero check or leak check 27
9.5 Uncertainty 28

10 Evaluation and reporting of the results 28

Annex A (informative) **Examples of particle number concentrations encountered during room user activities 30**

Annex B (informative) **Determination of the particle number size distribution of indoor aerosol using a differential mobility aerosol spectrometer 31**

Annex C (informative) **Water-CPCs 34**

Annex D (informative) **Checklist to collect information useful for interpreting indoor measurement of particle number concentration 36**
