ISO 23138:2024-07 (E)

Biological equipment for treating air and other gases - General requirements

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Process principles ... **4**

4.1 General fundamentals ... 4

4.2 Steps involved in pollutant elimination ... 4

4.2.1 General ... 4

4.2.2 Mass transfer ... 4

4.2.3 Biochemical conversion by microorganisms (enzyme catalysed reaction) ... 4

4.3 Classification of techniques ... 7

4.4 Design parameter ... 8

4.5 Biofilter ... 8

4.5.1 General description ... 8

4.5.2 General description of the procedure ... 9

4.5.3 Filter media ... 10

4.5.4 Nutrient and nutrient salt source ... 10

4.5.5 Moisture reservoir ... 11

4.5.6 Regeneration, replacement and disposal of filter media ... 11

4.6 Biotrickling filter ... 11

4.6.1 General description ... 11

4.6.2 General description of the procedure ... 12

4.6.3 Filter media ... 13

4.6.4 Clogging in biotrickling filters for the purification of organic compounds (VOC) ... 13

4.6.5 Nutrients and irrigation ... 14

4.6.6 Regeneration, replacement and disposal of filter media ... 14

4.7 Bioscrubber ... 14

4.7.1 General description ... 14

4.7.2 General description of the procedure ... 15

4.7.3 Nutrients and irrigation ... 16

5 Application ... **16**

6 Measurement and testing ... **18**

Bibliography ... **19**
