DIN EN 16339:2025-06 (E)

Ambient air - Method for the determination of the concentration of nitrogen dioxide by diffusive sampling

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Description of samplers 8
4.1 Principle 8
4.2 Diffusive samplers 9
4.2.1 Description 9
4.2.2 Preparation 9
4.2.3 Storage of samplers before and after sampling 10
4.2.4 Chemical interferences 10
4.3 Protective devices 10
4.3.1 General 10
4.3.2 Protective shelter 10
4.3.3 Protective filter 11
4.4 Instructions for use 11

5 Analysis 11
5.1 General 11
5.2 Colorimetric method 12
5.2.1 General 12
5.2.2 Calibration 12
5.2.3 Extraction 12
5.2.4 Analysis 13
5.3 Ion chromatography method 13
5.3.1 General 13
5.3.2 Calibration 13
5.3.3 Extraction 13
5.3.4 Analysis 14

6 Calculation of the concentration of nitrogen dioxide 14
6.1 Diffusive sampling rate 14
6.2 Mass concentration 15
6.3 Conversion to standard conditions of temperature and pressure 16

7 Quality control/quality assurance 16

8 Measurement strategy 17
8.1 Calibration of the diffusive sampling rate 17
8.2 Siting criteria 18
8.3 Use of replicates 18
8.4 Exposure 18
8.5 Co-location sites 18
8.6 Auxiliary information 19

9 Performance requirements and measurement uncertainty 19

10 Report 19

Annex A (normative) Description of tube-type samplers 21

Annex B (informative) Description of other samplers 27

Annex C (informative) Estimation of the diffusive sampling rate of the samplers 32

Annex D (informative) Measurement uncertainty 37

Annex E (informative) Reagents and equipment for analysis 47

Annex F (informative) Validation data of the use of protective devices 50
