

ISO 14966:2002-11 (E)

Ambient air - Determination of numerical concentration of inorganic fibrous particles - Scanning electron microscopy method

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Terms and definitions	1
3	Abbreviated terms	4
4	Principle	5
5	Apparatus and materials	5
5.1	Air sampling	5
5.2	Preparation of filters	7
5.3	Sample analysis	8
6	Air sample collection and analysis	9
6.1	Measurement planning	9
6.2	Collection of air samples	9
6.3	SEM specimen preparation	10
6.4	Analysis in the scanning electron microscope	12
7	Calculation of results	23
7.1	Calculation of the mean fibre concentration	23
7.2	Calculation of the 95 % confidence interval	24
8	Performance characteristics	24
8.1	General	24
8.2	Measurement uncertainty	25
8.3	Limit of detection	28
9	Test report	29
Annex A (normative) Preparation of filters for air sampling		31
Annex B (normative) Procedures for calibration and adjustment of the SEM		32
Annex C (informative) Characteristics and chemical composition of inorganic fibres		34
Annex D (informative) Poisson variability as a function of fibre density on sampling filter and area of filter analysed		39
Annex E (informative) Combination of the results from multiple samples		40
Bibliography		41
