Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Principles and minimum requirements for the three sampling methods 2
4.1 Principles 2
4.2 General minimum requirements for all sampling methods 2
4.3 General preparation and sampling 3

5 Method A -- Dilution method 4
5.1 Principle 4
5.2 Minimum requirements 4
5.3 Preparation and sampling 5

6 Method B -- (Heated) filter/condenser/adsorber method 7
6.1 Principle 7
6.2 Minimum requirements 7
6.3 Preparation and sampling 7

7 Method C -- Cooled probed/adsorber method 9
7.1 Principle 9
7.2 Minimum requirements 9
7.3 Preparation and sampling 10

Annex A (informative) Applicability of the sampling methods 12

Annex B (informative) Schematic presentations, dimensions and materials of some tested sampling devices 14
