ISO 16000-10:2006-02 (E)

Indoor air - Part 10: Determination of the emission of volatile organic compounds from building products and furnishing - Emission test cell method

Contents

Page

Foreword iv

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and abbreviated terms 3

5 Principle 4

6 Emission test cell system 4

7 Apparatus 5

8 Test conditions 5

9 Verification of the test conditions 6

10 Test specimens 7

11 Emission test cell preparation 7

12 Test method 8

13 Calculation of area specific emission rates and expression of results 8

14 Performance characteristics 9

15 Test report 9

Annex A (normative) System for quality assurance/quality control 11

Annex B (informative) Examples of area specific air flow rates in a model room 13

Annex C (informative) Example of an emission test cell 14
