Indoor air - Part 10: Determination of the emission of volatile organic compounds from building products and furnishing - Emission test cell method

Contents		Page
Foreword		iv
Introduction		vi
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Symbols and abbreviated terms		3
5 Principle		4
6 Emission test cell system		4
7 Apparatus		5
8 Test conditions		5
9 Verification of the test conditions		6
10 Test specimens		7
11 Emission test cell preparation		7
12 Test method		8
13 Calculation of area specific emission rates and expression of results		8
14 Performance characteristics		9
15 Test report		9
Annex A (normative) System for quality assurance/quality control		11
Annex B (informative) Examples of area specific air flow rates in a model room		13
Annex C (informative) Example of an emission test cell		14
Bibliography		16
