Indoor air - Part 1: General aspects of sampling strategy (ISO 16000-1:2004)

Contents		Page
Foreword		2
Introduction		4
1 Scope		5
2 Normative references		5
3 Special characteristics of the indoor environment		5
4 Measurement objective		7
5 Sampling procedure		7
6 Time of sampling		8
7 Sampling duration and sampling frequency		8
8 Sampling location		10
9 Parallel outdoor air measurements		10
Annex A (informative) Important types of indoor environment and sources of air pollutants		11
Annex B (informative) Sources of indoor air pollutants		12
Annex C (informative) Examples of substances and their sources		14
Annex D (informative) Guidelines for information to be recorded during indoor air measurement		17
Bibliography		25
