DIN EN 1267:2012-04 (E)

Industrial valves - Test of flow resistance using water as test fluid

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Test facility 6
4.1 General 6
4.2 Test tube lengths 8
4.3 Test tube sizes 8
4.3.1 Steel test tubes 8
4.3.2 Copper test tubes 9
4.4 Pressure tappings 9
4.5 Measurement devices 10
4.6 Test fluid 10

5 Test procedure 10
5.1 Test conditions 10
5.1.1 Permissible measurement fluctuations 10
5.1.2 Steady conditions 11
5.1.3 Permissible non-steady conditions 11
5.2 Pressure loss in test tubes 11
5.3 Valve test 12

6 Calculation 13
6.1 Valve pressure loss determination 13
6.2 Coefficient calculations 14
6.2.1 Flow resistance coefficient (zeta) 14
6.2.2 Flow coefficient, Kv 14
6.2.3 Flow coefficient, Cv 14
6.3 Uncertainty 15
6.3.1 Total measurement uncertainty 15
6.3.2 Flow coefficients, Kv and Cv 15
6.3.3 Pressure loss coefficient, (zeta) 16

7 Test report 16

Annex A (informative) Lower limit considerations 18

Annex B (informative) Flow rate and physical phenomena of flow through a valve 19

B.1 General 19
B.2 Normal flow conditions 20
B.3 Cavitation 21
B.4 Flashing (self-vaporizations) 21

Annex C (informative) Uncertainty on measurement 22

C.1 Introduction 22
C.2 Permissible measurement fluctuations 22

C.2.1 General 22
C.2.2 Direct visual observation of signals delivered by the systems 22
C.2.3 Automatic recording of signals delivered by measurement systems 23
C.2.4 Automatic integration of signals delivered by the measurement systems 24
C.3 Measured value stability on physical quantities 25
C.4 Determining flow rate and pressure loss coefficients in turbulent rating condition 26

Annex D (informative) Evaluation of uncertainty of flow rate coefficient (Kv) and pressure losses coefficient () 27

D.1 Generality 27
D.2 Evaluation of measurement uncertainty of the Kv (Cv) 27
D.2.1 Determination of flow rate coefficient 27
D.2.2 Identification of uncertainty of input quantities 28
D.2.3 Sensitivity coefficient 28
D.2.4 Type A evaluation uncertainty 29
D.2.5 Expression of relative uncertainty 29
D.3 Evaluation of measurement uncertainty of the 30
D.3.1 Determination of flow resistance coefficient 30
D.3.2 Identification of uncertainty of input quantities 30
D.3.3 Sensitivity coefficient 30
D.3.4 Type A evaluation uncertainty 32
D.4 Expression of relative uncertainty on 32

Bibliography 33
