ISO 5208:2015-06 (E)

Industrial valves - Pressure testing of metallic valves

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Termsanddefinitions 1

3 Conditions relevant to pressure testing 2
3.1 Purchaser examination options 2
3.2 Witnessing 3
3.3 Closure pressure testing options 3

4 Requirements for pressure testing 3
4.1 Forewarning 3
4.2 Location 3
4.3 Test equipment 3
4.4 Pressure measuring equipment 3
4.5 Shell surfaces 3
4.6 Test fluid 4
4.7 Test pressure 4
4.8 Pressure tests 4
4.9 Closure test compliance 4
4.10 Shell test 6
4.10.1 Shell test fluid 6
4.10.2 Shell test procedure 6
4.10.3 Shell test pressure 6
4.10.4 Shell test duration 6
4.10.5 Shell test acceptance criteria 6
4.11 Optional backseat test 7
4.11.1 General 7
4.11.2 Backseat test fluid 7
4.11.3 Recommended backseat test procedure 7
4.11.4 Backseat test pressure 7
4.11.5 Backseat test duration 7
4.11.6 Backseat test acceptance criteria 8
4.12 Closure test 8
4.12.1 General requirements 8
4.12.2 Closure test fluid 8
4.12.3 Leak detection 8
4.12.4 Closure test pressure 9
4.12.5 Closure test duration 9
4.12.6 Closure test progression 9
4.12.7 Closure test acceptance criteria 9
4.13 Certification of compliance 9
