

DIN EN 16668:2025-05 (E)

Industrial valves - Requirements and testing for metallic valves as pressure accessories

Contents		Page
European foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	8
4	Category of valves	9
5	Requirements	9
5.1	Design	9
5.1.1	General	9
5.1.2	Shell design strength	10
5.1.3	Protection against exceeding the allowable limits	10
5.2	Materials	10
5.2.1	General requirements	10
5.2.2	European harmonized material standards	10
5.2.3	European approval of materials (EAM)	10
5.2.4	Particular Material Appraisal (PMA)	11
5.2.5	Requirements for prevention of brittle fracture at low temperatures	11
5.2.6	Selection of bolting material	11
5.2.7	Material selection for parts other than shell	11
5.3	Manufacturing	12
5.3.1	Welding	12
5.3.2	Heat treatment	14
5.3.3	Traceability	14
5.3.4	Qualification of non-destructive testing personnel	14
5.4	Non-destructive testing (NDT)	14
5.4.1	Non-destructive testing of steel castings	14
5.4.2	Non-destructive testing of joint welding	14
5.5	Final assessment	14
5.6	Marking	15
5.7	Surface and coating testing	15
5.8	Documentation	15
5.8.1	Documentation for final inspection	15
5.8.2	Accompanying documents	16
Annex A (normative)	Classification of valves	17
Annex B (informative)	European harmonized standards for materials and components for shell parts	22
Annex C (informative)	European Approval of Materials (EAM)	24
Annex D (informative)	European harmonized standards for valves	25
Annex E (informative)	Non-destructive testing of steel castings	27

E.1	Terms and definitions	27
E.2	Non-destructive testing of steel castings	27
Annex F (normative) Non-destructive testing (NDT) of joint welding		35
F.1	General	35
F.2	Non-destructive testing (NDT) extent	35
F.3	Selection of NDT-methods	41
Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2014/68/EU (Pressure Equipment Directive) aimed to be covered		42
Bibliography		44
