ISO/TR 25104:2008-02 (E)

Intelligent transport systems - System architecture, taxonomy, terminology and data modelling - Training requirements for ITS architecture

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and abbreviated terms 2

5 Subjects for education and training 3
5.1 Background information 3
5.2 What are "Intelligent Transport Systems"? 3
5.3 "User Needs" and "Fundamental Services" requiring ITS 3
5.4 Systems architectures for ITS 4
5.5 Standardization for ITS 4
5.6 Interoperability is important and achievable 5
5.7 Systems engineering for ITS 5

6 Example curricula for training related to ITS architecture and ITS standards 5
6.1 Prerequisite training 5
6.2 Introduction to ITS 5
6.3 ITS technology 6
6.4 ITS theory 6
6.5 Architecture aspects of ITS service provision 7
6.6 Technology aspects of ITS service provision (as they relate to system architecture) 7
6.7 National and regional architecture development 8
6.8 Strategies to use standards in ITS 8
6.9 The process of standards development for ITS 8
6.10 National standards development organizations (SDO) for ITS 9
6.11 Other organizations relevant to ITS standards 9
6.12 Other architecture related issues 9

Bibliography 10
