

# ISO/TR 25104:2008-02 (E)

## Intelligent transport systems - System architecture, taxonomy, terminology and data modelling - Training requirements for ITS architecture

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols and abbreviated terms .....	2
5	Subjects for education and training .....	3
5.1	Background information .....	3
5.2	What are "Intelligent Transport Systems"? .....	3
5.3	"User Needs" and "Fundamental Services" requiring ITS .....	3
5.4	Systems architectures for ITS .....	4
5.5	Standardization for ITS .....	4
5.6	Interoperability is important and achievable .....	5
5.7	Systems engineering for ITS .....	5
6	Example curricula for training related to ITS architecture and ITS standards .....	5
6.1	Prerequisite training .....	5
6.2	Introduction to ITS .....	5
6.3	ITS technology .....	6
6.4	ITS theory .....	6
6.5	Architecture aspects of ITS service provision .....	7
6.6	Technology aspects of ITS service provision (as they relate to system architecture) .....	7
6.7	National and regional architecture development .....	8
6.8	Strategies to use standards in ITS .....	8
6.9	The process of standards development for ITS .....	8
6.10	National standards development organizations (SDO) for ITS .....	9
6.11	Other organizations relevant to ITS standards .....	9
6.12	Other architecture related issues .....	9
Bibliography .....		10
