

ISO 23828:2008-05 (E)

Fuel cell road vehicles - Energy consumption measurement - Vehicles fuelled with compressed hydrogen

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Measurement accuracy	2
4.1	General	2
4.2	Hydrogen measurement accuracy	2
5	Hydrogen consumption measurement	2
5.1	General	2
5.2	Pressure method	3
5.3	Gravimetric method	3
5.4	Flow method	3
6	Test procedure	3
6.1	General condition	3
6.2	Vehicle condition	3
6.3	Chassis dynamometer conditions	4
6.4	Fuel consumption tests	5
6.5	Measurement over scheduled driving test	5
6.6	Correction of the test results for FCHEV	6
7	Presentation of results	6
Annex A (informative)	Test procedure in Japan	7
Annex B (informative)	Test procedure in Europe	13
Annex C (informative)	Test procedure in the USA	17
Annex D (normative)	Pressure method	23
Annex E (normative)	Gravimetric method	25
Annex F (normative)	Flow method	27
Annex G (informative)	Current method	28
Annex H (informative)	Determination of tank surface temperature measuring points	30
Annex I (informative)	Test results of hydrogen consumption of test vehicle	34
Annex J (normative)	Allowable energy change	36
Annex K (normative)	Linear correction method using a correction coefficient for FCHEV	37

Annex L (informative) Procedure to obtain correction coefficient for FCHEV	38
Bibliography	40
