ISO 17572-1:2008-12 (E)

Intelligent transport systems (ITS) - Location referencing for geographic databases - Part 1: General requirements and conceptual model

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Terms and definitions 2
2.1 General terms 2
2.2 UML expressions for diagrams 7

3 Abbreviated terms 8

4 Objectives and requirements for a location referencing method 9
4.1 Objectives for an optimal location referencing method 9
4.2 Requirements of the location referencing method 9

5 Conceptual data model for location referencing methods 11
5.1 Role of conceptual model 11
5.2 Components of conceptual model 11
5.3 Description of the conceptual model 11
5.4 Location categories 12
5.5 Conceptual model of road network 13
5.6 Conceptual model of area locations 14

Annex A (informative) Inventory of location referencing methods 16

Annex B (informative) Examples of location referencing methods in use (mapping to conceptual data model for location referencing systems) 20

Annex C (informative) Description of UML expression elements 22

Annex D (informative) Comparison of definitions with TC 211 24

Annex E (informative) Introduction to the TPEG physical format 28
