

ISO 12345:2013-03 (E)

Diesel engines - Cleanliness assessment of fuel injection equipment

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Test apparatus	3
4.1	General	3
4.2	Pressure source	3
4.3	Verification high-pressure pipe assembly	4
4.4	Verification test injector	4
4.5	Collecting vessel	4
4.6	Verification rail	4
4.7	Equipment for contamination measurement	4
4.8	Test fluid	6
4.9	Clean-up filter	7
4.10	Pressure gauge	7
5	Procedure	7
5.1	General	7
5.2	High-pressure supply pumps (common rail fuel injection system)	8
5.3	Unit injectors	9
5.4	Fuel injection pumps	10
5.5	CR fuel injectors	11
5.6	Fuel injectors (Nozzle holder assemblies)	13
5.7	High-pressure fuel injection pipes	14
5.8	Rails	16
5.9	Low-pressure systems	19
6	Sample analysis	20
6.1	General	20
6.2	Gravimetric analysis	20
6.3	Particle size distribution	20
6.4	Largest particle size	20
7	Reporting results	20
7.1	Principle of fuel injection equipment cleanliness code	20
7.2	Examples of fuel injection equipment cleanliness code usage	21
8	Designation	22
Annex A (informative) Typical test equipment for measuring fuel injection equipment cleanliness ...		23
Annex B (informative) Rail low pressure flushing test		30
Annex C (informative) Procedure for verifying test equipment initial cleanliness		32
Annex D (informative) Determination of flushing parameters for rail pressure vessel flushing test		34
Bibliography		36
