Foreword 4

Introduction 6

1 Scope 7

2 Normative references 7

3 Abbreviated terms 7

4 Location coding 8
4.1 General 8
4.2 Location tables 9
4.2.1 General 9
4.2.2 Versions and versioning of location tables 9
4.2.3 Exchanging location tables 10
4.2.4 Hierarchical structure 10
4.2.5 Offsets 11
4.2.6 Location types 12
4.2.7 Direction of the road 12
4.2.8 Country codes and location table numbers 12
4.2.9 Constraints 13
4.3 TMC Location categories, types and subtypes 13
4.4 Location table content 13
4.4.1 General 13
4.4.2 Nominal record content 13
4.4.3 Road descriptions 18
4.4.4 Names 18
4.4.5 Upward references 18
4.4.6 Offsets 19
4.4.7 Urban 19
4.4.8 Intersection reference 19
4.4.9 WGS 84 co-ordinates 19
4.4.10 InterruptsRoad 19
4.5 Detailed junction referencing 20
4.5.1 Conventional junctions 20
4.5.2 Complex junctions 20
4.5.3 Detailed coding of link roads 20
4.6 Detailed situation locations 21
4.6.1 Normal location referencing 21
4.6.2 Detailed location referencing 21
4.6.3 Precise location referencing 21
4.7 One and two way locations 21
4.7.1 Basic principles 21
4.7.2 Junctions 21
4.7.3 Locations having only an exit or entry and locations occurring on one side only 21

Annex A (normative) TMC Location categories, types and subtypes 24

A.1 General 24
A.2 Area locations 24
A.3 Linear locations 26
A.4 Point locations 28

Annex B (normative) Location table numbers 34

Annex C (normative) Detailed methods for the usage of location tables 37

C.1 Methods for referencing affected road sections 37
C.1.1 General 37
C.1.2 Pre-defined primary location + extent 37
C.1.3 Pre-defined primary and secondary locations 38
C.1.4 Distance markers (primary location + extent) 38
C.1.5 Distance markers (primary + secondary location) 39
C.1.6 Primary and secondary locations using pre-defined location, extent and distances 39
C.1.7 Primary and secondary locations using pre-defined locations + distances 40
C.1.8 Describing the extent of an event in ALERT-C 40
C.1.9 Co-ordinates (primary + secondary locations) 42
C.1.10 Proprietary referencing systems, e.g. GDF 42
C.1.11 Text location naming 42
C.1.12 Precise location referencing 42
C.2 Methods for referencing specific features 46
C.2.1 Parking facilities 46
C.2.2 Other isolated POIs 48
C.2.3 Parallel Roads 49
C.2.4 Interrupted Roads 51
C.3 Methods for identifying and exchanging location tables 52
C.3.1 Identifying versions of a location table 52
C.3.2 Exchanging location tables - the Location Table Exchange Format 52

Annex D (informative) Background information 72

D.1 Overall approach 72
D.1.1 General 72
D.1.2 Pre-defined locations 72
D.1.3 GDF features 73
