

ISO/TS 17423:2014-04 (E)

Intelligent transport systems - Cooperative systems - ITS application requirements and objectives for selection of communication profiles

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	2
5	Communication service parameters	4
5.1	Abstraction of application processes from communications	4
5.2	Communication service parameter classes	7
5.3	Operational communication service parameters	8
5.4	Destination communication service parameters	9
5.5	Performance communication service parameters	10
5.6	Security communication service parameters	12
5.7	Protocol communication service parameter	12
5.8	Communication service parameters overview	13
6	Policies and regulations	14
6.1	Cost policy	14
6.2	Need for station anonymity	16
6.3	Need for station location privacy	16
6.4	Support of station authentication	16
7	ITS-S procedures for ITS-S communication profile selection	16
7.1	Overview	16
7.2	Presentation of communication service parameters	16
7.3	Monitoring of capabilities of communications	17
7.4	Monitoring of regulations and policies	18
7.5	Selection of ITS-S communication profiles	18
7.6	Interaction with user of ITS-SU	18
7.7	Support of other application processes	18
Annex A (normative) ASN.1 modules		20
Annex B (informative) Example of presentation of communication service parameters		26
Annex C (informative) On communication requirements and objectives		29
Bibliography		32
