

# DIN EN 12645:2015-02 (E)

## Tyre pressure measuring instruments - Devices for inspection of pressure and/or inflation / deflation of tyres for motor vehicles - Metrology, requirements and testing

---

| <b>Contents</b> |  | <b>Page</b> |
|-----------------|--|-------------|
| Foreword .....  |  | 4           |
| 1               | Scope .....  | 5           |
| 2               | Normative references .....   | 5           |
| 3               | Terms and definitions .....  | 6           |
| 4               | Categories .....   | 8           |
| 5               | Metrological requirements .....  | 10          |
| 5.1             | Maximum permissible errors .....   | 10          |
| 5.2             | Hysteresis error .....   | 10          |
| 5.3             | Zero .....   | 10          |
| 5.3.1           | Return of the instrument's indication to zero .....  | 10          |
| 5.3.2           | Zero setting .....   | 10          |
| 5.4             | Units .....  | 11          |
| 6               | Technical requirements .....   | 11          |
| 6.1             | Construction .....   | 11          |
| 6.2             | Analog indicating tyre pressure measuring instrument .....   | 11          |
| 6.2.1           | Scale angle .....  | 11          |
| 6.2.2           | Scale interval .....   | 11          |
| 6.2.3           | Scale spacing .....  | 11          |
| 6.2.4           | Index .....  | 12          |
| 6.3             | Digital indicating tyre pressure measuring instrument .....  | 12          |
| 6.3.1           | Scale interval .....   | 12          |
| 6.3.2           | Readability .....  | 12          |
| 6.4             | Additional constructional requirements .....   | 12          |
| 6.4.1           | Mechanical tyre pressure measuring instruments .....   | 12          |
| 6.4.2           | Electronic tyre pressure measuring instrument .....  | 12          |
| 6.4.3           | Electronic and mechanical tyre pressure measuring instruments .....  | 13          |
| 6.4.4           | Preset device .....  | 13          |
| 6.5             | Operating conditions .....   | 13          |
| 6.5.1           | Climatic requirements .....  | 13          |
| 6.5.2           | Mechanical requirements .....  | 14          |
| 6.5.3           | Electromagnetic immunity requirements for electronic tyre pressure measuring instruments (with digital display and/or electronic sensor) ..... | 15          |
| 6.5.4           | Software requirements for electronic tyre pressure measuring instruments .....   | 16          |
| 6.5.5           | Mounting position requirements .....   | 17          |
| 6.5.6           | Kind of pressure indication requirement .....  | 17          |
| 7               | Type approval testing to check for compliance with metrological and technical requirements .....   | 17          |
| 7.1             | General .....  | 17          |
| 7.2             | Determination of accuracy error .....  | 18          |
| 7.3             | Determination of hysteresis error .....  | 18          |
| 7.4             | Determination of return of instrument's indication to zero .....   | 18          |
| 7.5             | Determination of error after/during a disturbance or influence .....   | 18          |
| 7.6             | Climatic tests .....   | 18          |
| 7.6.1           | Determination of the MPE in the rated temperature in service .....   | 18          |

|  |  |    |
|--|--|----|
| 7.6.2  | Rated storage temperature .....  | 19 |
| 7.6.3  | Humidity .....   | 19 |
| 7.6.4  | Corrosion test .....   | 19 |
| 7.7  | Mechanical tests .....   | 19 |
| 7.7.1  | Protection against ingress of water and foreign particles (degree of protection) .....   | 19 |
| 7.7.2  | Examination of the durability of the measuring instrument .....                          | 20 |
| 7.7.3  | Vibration (random) .....   | 20 |
| 7.7.4  | Free fall .....  | 21 |
| 7.8  | Electromagnetic immunity .....   | 21 |
| 7.8.1  | AC mains voltage variations .....  | 21 |
| 7.8.2  | DC mains voltage variations .....  | 21 |
| 7.8.3  | AC mains power .....   | 21 |
| 7.8.4  | Bursts on AC and DC mains .....  | 21 |
| 7.8.5  | Electrostatic discharges .....   | 21 |
| 7.8.6  | Fast transients on signal and I/O lines .....  | 22 |
| 7.8.7  | Surges on signal and I/O lines .....   | 22 |
| 7.8.8  | DC mains power .....   | 22 |
| 7.8.9  | Ripple on DC input power ports .....   | 22 |
| 7.8.10   | Surges on AC and DC mains lines .....  | 22 |
| 7.8.11   | Radiated radio-frequency electromagnetic fields .....                                    | 22 |
| 7.8.12   | Conducted radio-frequency fields .....   | 22 |
| 7.8.13   | Voltage variations (if powered by vehicle battery) .....                                 | 22 |
| 7.8.14   | Electrical transient conduction along supply lines (if powered by vehicle battery) ..... | 23 |
| 7.8.15   | Load dump (if powered by vehicle battery) .....  | 23 |
| 7.9  | Software examination .....   | 25 |
| 7.10   | Mounting position .....  | 26 |
| 7.11   | Determination of pressure sensor -- kind of pressure test .....                          | 26 |
| 8  | Inscriptions and marking .....   | 26 |
| 8.1  | Inscriptions .....   | 26 |
| 8.1.1  | Obligatory inscriptions .....  | 26 |
| 8.1.2  | Optional inscriptions .....  | 27 |
| 8.2  | Verification marks and sealing .....   | 27 |
| 9  | Metrological control .....   | 27 |
| 9.1  | Type approval .....  | 27 |
| 9.2  | Initial Verification .....   | 27 |
| 9.3  | Subsequent verification .....  | 27 |
| 9.4  | In-service control .....   | 28 |
| Annex A (normative) Correspondence between requirements and tests .....                  |  | 29 |
| Annex B (normative) MPE graphics .....   |  | 30 |
| Annex C (informative) Examples of type approval test sequence for multiple samples ..... |  | 32 |
| Annex D (informative) Recommended solutions for special test conditions .....            |  | 35 |
| Bibliography .....   |  | 36 |
