

ISO/TR 24097-2:2015-10 (E)

Intelligent transport systems - Using web services (machine-machine delivery) for ITS service delivery - Part 2: Elaboration of interoperable web services' interfaces

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Abbreviated terms		2
5 Notation and conventions		3
5.1 Namespace URI and prefixes used in this specification		3
5.2 Web service syntax notation: pseudo-schemas		3
5.3 XPath 1.0 expression		4
5.4 SOA stack name notation		4
5.5 The context of the terms WSDL, SOAP, and BP		4
5.6 Examples		4
5.7 The term {service, user}		4
6 Interoperable version selection of interface description metadata		4
7 SOAP version selection		5
7.1 SOAP 1.1 or SOAP 1.2?		5
7.2 Creating a SOAP 1.2 web service		5
7.3 SOAP 1.2 usage indication		6
8 WS-I basic profile conformance		7
8.1 What is WS-I?		7
8.2 Specific WS metadata and WS metadata relationships		8
8.3 Creating a basic profile conformant service		9
8.3.1 Using a WSDL editor		10
8.3.2 Using an XML editor		11
8.4 BP conformance claim		13
Annex A (informative) Pseudo WSDL 1.1 expression		14
Annex B (informative) Main standard schema locations		16
Annex C (informative) BP 1.2 and BP2.0 Coverage items		17
Annex D (informative) BP 1.2 and BP2.0 conformance policy assertion schema		19
Bibliography		20
