

ISO/TR 17427-3:2015-11 (E)

Intelligent transport systems - Cooperative ITS - Part 3: Concept of operations (ConOps) for 'core' systems

Contents		Page
Foreword		vi
Introduction		viii
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	4
5	Using this Technical Report	5
6	Overview of the role of a 'Core System' in C-ITS	5
6.1	What is a Concept of operations?	5
6.2	What are the core functions?	6
6.3	Functional subsystems	6
6.4	Institutional context	7
6.5	Specific service features characterizing C-ITS service provision	8
6.6	C-ITS and communication technologies	10
6.6.1	General	10
6.6.2	VANETs, MANETs and 'latency'	10
6.6.3	Hybrid communications	13
6.6.4	Short and medium range communication	15
6.6.5	Long range communication	16
6.6.6	Wide area broadcast	16
6.6.7	Positioning services	16
6.6.8	Digital road map data	17
6.7	Actors involved in C-ITS service provision	17
6.8	C-ITS enabling data	20
6.9	Cooperative ITS applications and services	22
6.9.1	System of systems	23
6.10	C-ITS Privacy and anonymity	23
6.10.1	Privacy overview	23
6.10.2	Data messages and privacy	24
6.10.3	Security	25
6.10.4	Data management (including capture, storage and access)	25
7	'Core' systems	26
7.1	Core system overview	26
7.1.1	General	26
7.1.2	Single core systems	27
7.1.3	Multiple core systems	27
7.1.4	Other 'Central' systems	27
7.1.5	Facilitate a platform for sharing of information and efficient use of resources	28
7.2	Justification for 'Core Systems'	28
7.2.1	Vision, drivers and objectives	28
7.2.2	Key strategic objectives for the deployment of core system support	29
7.2.3	Key technical objectives for the deployment of core system support	29
7.2.4	Principal elements of a core system	30

7.2.5	Proposed features of C-ITS core systems	31
7.2.6	Main mission of the `Core System'	35
7.2.7	Scope of `Core System' services	36
7.2.8	Exclusions from CorSys	36
7.2.9	Probe data storage	36
7.2.10	Roadside equipment (RSE)	37
7.2.11	External support systems (ESS)	37
7.2.12	Communications options	37
7.2.13	Authority/jurisdiction databases	38
7.2.14	Core system stakeholders	39
7.2.15	Core system communications	39
7.2.16	Applications	42
7.2.17	Core system interactions	42
7.2.18	Core system operational goals	43
7.3	`Core system' overview of requirements	44
7.3.1	Definition of a requirement	44
7.3.2	`Core System' requirements identification process	44
7.3.3	Functional components	49
7.4	Background, objectives and scope of a `Core System'	50
7.5	Operational policies and constraints	51
7.5.1	Certification	51
7.5.2	Operations and maintenance	52
7.5.3	Security management	52
7.5.4	Data provision/ownership	52
7.5.5	System performance management	52
7.5.6	Flexibility	53
7.5.7	Core system characteristics and environment	53
7.5.8	Deployment configurations	54
7.5.9	Deployment footprint	54
7.5.10	Subsystems	57
7.5.11	Subsystem descriptions	57
7.6	Modes of operation	62
7.7	User types and other involved personnel	64
7.8	Operational scenarios	65
7.9	Vehicle-originated broadcast	66
7.10	Infrastructure-vehicle-unicast	69
7.11	Support environment	71
7.11.1	Subsystems	72
7.11.2	Personnel	72
7.11.3	Processes	72
7.12	Disadvantages and limitations	72
8	Example use cases	73
8.1	General	73
8.2	Example Use Case (1): User data exchange	74
8.3	Example Use Case (2): Certificate distribution	75
8.4	Example Use Case (3): Certificate revocation list distribution	75
8.5	Example Use Case (4): Misbehaviour action: Certificate revocation list addition	76
8.6	Example Use Case (5): Data subscription	77
8.7	Example Use Case (6): Remote services	78
8.8	Example Use Case (7): Core service status distribution	79
8.9	Example Use Case (8): `Core System' operations	80
8.10	Example Use Case (9): System expansion	80
8.11	Example Use Case (10): Core discovery	81
8.12	Example Use Case (11): Service data backup	82
8.13	Example Use Case (12): Service takeover	82
9	Summary of impacts	83
9.1	Operational impacts	83
9.1.1	Policy	83
9.1.2	System management	84

9.1.3	System operation	85
9.1.4	Service receipt	85
9.2	Organizational impacts	87
9.2.1	Policy	87
9.2.2	System management	88
9.2.3	System operation	89
9.3	Impacts during the deployment phases	89
9.3.1	System management	90
9.4	Measuring the impacts	90
10	Cooperative vehicle and highway systems policy and institutional issues	91
11	Funding and governance	91
	Bibliography	94
