

# ISO 18300:2016-11 (E)

## Electrically propelled vehicles - Test specifications for lithium-ion battery systems combined with lead acid battery or capacitor

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Abbreviated terms .....	3
5	Type of connection with lithium-ion battery system .....	3
5.1	Lithium-ion battery pack or system combined with lead acid battery (LIPB) .....	3
5.2	Lithium-ion battery pack or system combined with electric double layer capacitor energy storage system (LICA) .....	3
6	General requirements .....	4
7	Test for LIPB .....	5
7.1	Pre-conditioning .....	5
7.1.1	Purpose .....	5
7.1.2	Procedure .....	5
7.2	Rated capacity .....	5
7.2.1	Purpose .....	5
7.2.2	Procedure .....	5
7.3	Micro-cycle test .....	6
7.3.1	Purpose .....	6
7.3.2	Micro-cycle without regenerative charging .....	6
7.3.3	Micro-cycle with regenerative charging .....	7
7.4	Cycle life test .....	9
7.4.1	Purpose .....	9
7.4.2	Procedure .....	9
7.4.3	Requirement .....	9
8	Tests for LICA .....	9
8.1	Pre-conditioning .....	9
8.1.1	Purpose .....	9
8.1.2	Procedure .....	9
8.2	Micro-cycle with regenerative test .....	10
8.2.1	Purpose .....	10
8.2.2	Procedure .....	10
8.3	Cold cranking power .....	10
8.3.1	Purpose .....	10
8.3.2	Procedure .....	10
8.3.3	Requirement .....	11
Annex A (informative)	LICA and LIPB .....	12
Bibliography .....		15
