|--------------------|---|-------------|
| Foreword .....     |   | v           |
| Introduction ..... |   | vi          |
| 1                  | Scope .....                                       | 1           |
| 2                  | Normative references .....                        | 1           |
| 3                  | Terms and definitions .....                       | 1           |
| 4                  | Abbreviated terms .....                           | 3           |
| 5                  | Toolkit specific constraints .....                | 4           |
| 5.1                | Version number signalling .....                   | 4           |
| 5.2                | Extension .....                                   | 4           |
| 6                  | OLR structure .....                               | 4           |
| 6.1                | Location types .....                              | 4           |
| 6.1.1              | Supported location types .....                    | 4           |
| 6.1.2              | Linear locations .....                            | 5           |
| 6.1.3              | Point locations .....                             | 6           |
| 6.1.4              | Area locations .....                              | 8           |
| 6.2                | Requirements .....                                | 11          |
| 6.2.1              | General .....                                     | 11          |
| 6.2.2              | Map requirements .....                            | 11          |
| 6.2.3              | Location properties .....                         | 12          |
| 6.3                | Logical data format specification .....           | 13          |
| 6.3.1              | General .....                                     | 13          |
| 6.3.2              | Building blocks .....                             | 14          |
| 6.3.3              | Additional data .....                             | 18          |
| 6.3.4              | Location reference point .....                    | 20          |
| 6.4                | Data format rules .....                           | 26          |
| 6.4.1              | OpenLRTM rules .....                              | 26          |
| 6.4.2              | Overview of the data format rules .....           | 27          |
| 6.5                | Physical representations of geo-coordinates ..... | 28          |
| 6.5.1              | General .....                                     | 28          |
| 6.5.2              | Absolute geo-coordinates .....                    | 28          |
| 6.5.3              | Relative geo-coordinates .....                    | 28          |
| 7                  | OLR message components .....                      | 29          |
| 7.1                | OpenLRLocationReference .....                     | 29          |
| 7.2                | AbstractLocationReference .....                   | 29          |
| 7.3                | LinearLocationReference .....                     | 30          |
| 7.4                | GeoCoordinateLocationReference .....              | 30          |
| 7.5                | PointAlongLineLocationReference .....             | 31          |
| 7.6                | POIWithAccessPointLocationReference .....         | 32          |
| 7.7                | CircleLocationReference .....                     | 33          |
| 7.8                | PolygonLocationReference .....                    | 34          |
| 7.9                | RectangleLocationReference .....                  | 35          |

|  |  |    |
|--|--|----|
| 7.10   | GridLocationReference .....              | 35 |
| 7.11   | ClosedLinearLocationReference .....      | 36 |
| 7.12   | LineProperties .....                     | 37 |
| 7.13   | PathProperties .....                     | 38 |
| 7.14   | LocationDescription .....                | 38 |
| 7.15   | AbstractShape .....                      | 38 |
| 7.16   | Shape .....                              | 38 |
| 7.17   | Path .....                               | 39 |
| 8  | OLR datatypes .....                      | 39 |
| 8.1  | AbsoluteGeoCoordinate .....              | 39 |
| 8.2  | RelativeGeoCoordinate .....              | 39 |
| 8.3  | Bearing .....                            | 39 |
| 8.4  | DistanceMetresMax15000 .....             | 40 |
| 8.5  | FirstLocationReferencePoint .....        | 40 |
| 8.6  | IntermediateLocationReferencePoint ..... | 40 |
| 8.7  | LastLocationReferencePoint .....         | 40 |
| 8.8  | PointLocationLineReferenceData .....     | 41 |
| 8.9  | Rectangle .....                          | 41 |
| 9  | OLR tables .....                         | 41 |
| 9.1  | olr001:FunctionalRoadClass .....         | 41 |
| 9.2  | olr002:FormOfWay .....                   | 42 |
| 9.3  | olr003:Orientation .....                 | 42 |
| 9.4  | olr004:SideOfRoad .....                  | 42 |
| Annex A (normative) TPEG application, TPEG-Binary Representation ..... |  | 43 |
| Annex B (normative) TPEG application, TPEG-ML Representation .....     |  | 51 |
| Bibliography .....   |  | 59 |
