ISO 20035:2019 (E)

Intelligent transport systems — Cooperative adaptive cruise control systems (CACC) — Performance requirements and test procedures

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols and abbreviated terms

5 Classification

5.1 Type of CACC systems
5.2 Curve capabilities
5.3 Classes of on-board V2X devices

6 Requirements

6.1 V2V CACC
6.1.1 V2V CACC response
6.1.2 Region of interest
6.1.3 Potential Vehicle of Interest (PVOI)
6.1.4 State transition diagram
6.1.5 Control operation strategy
6.1.6 V2V CACC data requirements
6.2 I2V CACC
6.2.1 Control Operation Strategy
6.2.2 I2V CACC data requirements
6.3 General operational control requirements

7 Performance evaluation test methods

7.1 V2V CACC
7.1.1 Communication range test
7.1.2 Accuracy test (lane and range discrimination tests)
7.1.2.1 Lane discrimination test
7.1.2.2 Range discrimination test
7.1.3 V2V cooperative operating modes/states tests
7.1.3.1 Non-follow mode test
7.1.3.2 Follow mode test (transition from ACC to CACC follow mode)
7.1.3.3 Close-follow mode test (transition from ACC to CACC close-follow mode)
7.1.3.4 Fault scenario test
7.1.3.5 CACC mode transition test when other vehicle cut-in (transition from close-follow mode to follow mode)
7.2 I2V CACC
7.2.1 Set speed test
7.2.2 Time fap test
7.3 Test environment conditions
