Intelligent transport systems - Using web services (machine-machine delivery) for ITS service delivery - Part 3: Quality of service

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Abbreviated terms	3
5 Notation and conventions	4
5.1 Namespace URI and prefixes used in this document	4
5.2 Web service syntax notation: pseudo-schemas	5
5.3 XPath 1.0 expression	6
5.4 XML infoset	6
5.5 SOA stack name notation	6
5.6 Examples	6
6 Web services overview	6
7 QoS overview	7
8 QoS standards	8
8.1 WS-Policy language	9
8.2 WS-Policy 1.5 — Framework	10
8.2.1 Policy authoring style	10
8.2.2 A policy description by combining domain specific policies	13
8.3 WS-Policy 1.5 — Attachment	13
8.3.1 Combining multiple policies	15
8.3.2 Policy attachment points, policy subjects, and policy scope	15
9 Domain specific policy overview	17
9.1 Messaging metadata (WS-Addressing metadata)	18
9.1.1 WS-Addressing standard	18
9.1.2 WS-Addressing 1.0 — Core and Web Services Addressing 1.0 — SOAP Binding	19
9.1.3 WS-Addressing 1.0 — Metadata	20
9.1.4 Elaboration of WS-AddressingMetadata	20
9.2 WS-SecurityPolicy (WSSP)	21
9.2.1 WSSP standard	21
9.2.2 WSSP scope	22
9.2.3 WS-SecurityPolicy fundamental	23
9.2.4 Cryptographic algorithms and key length	24
9.2.5 WSSP use case	24
9.2.6 Validation of WS-SecurityPolicy document	29
9.3 Web Services Reliable Messaging Policy Assertion	29
9.3.1 RM Policy Assertions	30
9.4 MTOM policy (MTOM Serialization Policy Assertion 1.1)	30
9.5 SOAP usage policy (Web Services SOAP Assertions)	31
10 Metadata versioning	31
11 Security considerations	32
Annex A (informative) Security relevant web services standards	34
Annex B (informative) JAX-WS	38
Bibliography	39
