ISO 19642-1:2019 (E)

Road vehicles — Automotive cables — Part 1: Vocabulary and design guidelines

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

3.1 Terms related to voltage rating
3.2 Terms related to temperatures
3.3 Terms related to cables

Annex A (informative) Design guidelines for calculation of dimensions in multi-core cables

A.1 General
A.2 Outside diameter of twisted cores
A.3 Maximum diameter under sheath
A.4 Minimum insulation wall thickness in multi-core cables
A.5 Conductor resistance increase due to bunching/twisting
A.5.1 General
A.5.2 Geometric lengthening
A.5.3 Stress induced lengthening
A.5.4 Maximum conductor resistance in multi-core cables
A.6 Wall thickness of sheath and bedding layer
A.7 Minimum wall thickness
A.8 Screen
A.9 Cable outside diameter

Annex B (informative) Recommended colour concentrations

Page count: 22
