DIN EN ISO 15118-1:2019-08 (E)

Road vehicles - Vehicle to grid communication interface - Part 1: General information and use-case definition (ISO 15118-1:2019); English version EN ISO 15118-1:2019

Contents

Page

Foreword ... **v**

Introduction ... **vi**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **2**
3.1 General terms ... 2
3.2 Control modes ... 13
3.3 Architecture channel ... 13
3.4 Forward and reverse power transfer ... 13
3.5 Minimum and maximum energy request limits ... 13
3.6 Source generator modes ... 14

4 Abbreviated terms ... **14**

5 Requirements ... **15**
5.1 List of requirements ... 15
5.2 General communication requirements ... 15
5.3 User-specific requirements ... 16
5.3.1 Reliability, availability, error handling and error reporting ... 16
5.3.2 Private data protection ... 17
5.3.3 Ease of use ... 17
5.4 OEM-specific requirements ... 17
5.5 Utility-specific requirements ... 18
5.5.1 Power limiting for grid control or local energy control ... 18
5.5.2 Current and voltage limits for EV supply equipment protection ... 19
5.5.3 Current and voltage limits for EV protection ... 19
5.5.4 Authorization of charging services ... 19
5.5.5 Authorization of energy transfer from the EV to the EV supply equipment ... 20
5.5.6 Retrofitting ... 20
5.6 Wireless communication requirements ... 20
5.6.1 General ... 20
5.6.2 Communication infrastructure requirements ... 20
5.7 RPT description ... 21
5.7.1 General ... 21
5.7.2 General information and requirements ... 22
5.8 Traceability requirements ... 22

6 Actors ... **23**

7 Use case elements ... **24**
7.1 General ... 24
7.2 Task groups ... 25
7.3 Task groups description ... 26
7.3.1 Start of communication process [A] ... 26
7.3.2 Plug-in and forced HLC ... 28
7.3.3 WA1: discovery with reservation ... 29
7.3.4 Plug-in with concurrent IEC 61851-1 and HLC ... 29
7.3.5 WA2: discovery without reservation ... 30

7.4 Communication set-up [B] ... 31
7.4.1 EVCC/SECC conductive communication set-up ... 31
7.4.2 WB1: EVCC/SECC wireless communication set-up ... 32
7.5 Certificate handling [C] ... 32
7.5.1 Certificate update ... 32
7.5.2 Certificate installation ... 33
7.6 Identification and authorization [D] ... 35
7.6.1 Overview ... 35
7.6.2 Authorization using contract certificates performed at the EV supply equipment ... 36
7.6.3 Authorization using contract certificates performed with the help of an SA ... 37
7.6.4 Authorization at the EV supply equipment using external credentials performed at the EV supply equipment ... 39
7.6.5 Authorization at the EV supply equipment using external credentials performed with the help of an SA ... 40
7.6.6 WD1: Authentication with prior reservation ... 41
7.7 Pairing and fine positioning ... 42
7.7.1 WP1: WPT fine positioning ... 42
7.7.2 WP2: WPT fine positioning without communication support ... 42
7.7.3 WP3: Conductive energy transfer pairing ... 43
7.7.4 WP4: WPT pairing ... 44
7.8 Target setting and energy transfer scheduling [E] ... 45
7.8.1 AC charging with load levelling based on HLC ... 45
7.8.2 WE1: WPT target setting and charge scheduling ... 46
7.8.3 Optimized charging with scheduling from secondary actors ... 46
7.8.4 DC charging with load levelling based on HLC ... 48
7.8.5 Resume to authorized charging schedule ... 49
7.8.6 Reverse power transfer with load levelling based on HLC ... 50
7.8.7 Reverse power transfer on stand-alone operation ... 51
7.8.8 Fast responding energy transfer services based on dynamic control mode ... 52
7.8.9 Managed bidirectional power transfer into the grid and/or into the home ... 54
7.9 Energy transfer controlling and re-scheduling [F] ... 56
7.9.1 Energy transfer loop ... 56
7.9.2 Energy transfer loop with metering information exchange ... 57
7.9.3 WF1: WPT charging loop ... 58
7.9.4 Energy transfer loop with interrupt from the SECC ... 59
7.9.5 Energy transfer loop with interrupt from the EVCC or USER ... 59
7.9.6 Energy transfer control based on dynamic control mode ... 60
7.10 Value-added services [G] ... 62
7.10.1 Value-added services ... 62
7.10.2 WG1: ACD system status check ... 63
7.10.3 Energy transfer details ... 64
7.11 End of energy transfer process [H] ... 64
7.11.1 General ... 64
7.11.2 End of energy transfer process ... 65
7.12 WPT end of charge WH1 ... 66
7.12.1 General ... 66
7.12.2 WPT end of charge WH1 ... 66
7.13 ACD connect/disconnect WI ... 68
7.13.1 ACD connect/disconnect WI ... 68
Annex A (informative) **Conductive charging infrastructure architecture** ... **69**
Annex B (informative) **Security** ... **82**
Annex C (informative) **Examples of charging scenarios derived from the use case elements** ... **88**
Annex D (informative) **Typical RPT system** ... **106**
Annex E (normative) **Requirement list** ... **108**
Bibliography ... **116**
