## Intelligent transport systems - Framework architecture for plug and play (PnP) functionality in vehicles utilizing nomadic devices

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Abbreviated terms .....	2
5	Conventions .....	2
6	Technical information .....	2
6.1	General descriptions .....	2
6.2	Framework architecture for in-vehicle PnP .....	3
6.3	Information transmission logic .....	3
6.4	Information from a PNP vehicle to occupants .....	4
6.4.1	General .....	4
6.4.2	Sensor related information .....	4
6.4.3	Communication related information .....	5
6.4.4	Mechanical related information .....	5
6.5	Information from occupant to PnP vehicle .....	5
6.5.1	General .....	5
6.5.2	Occupants' information .....	5
7	Use case scenario .....	5
7.1	Use case 1 -- Acceptance and denial of service usage .....	6
7.1.1	Overview .....	6
7.1.2	Description .....	6
7.1.3	Example .....	6
7.2	Use case 2 -- Ownership exchanging .....	7
7.2.1	Overview .....	7
7.2.2	Description .....	7
7.2.3	Example .....	8
7.3	Use case 3 -- Suggestion of optimum functional package .....	8
7.3.1	Overview .....	8
7.3.2	Description .....	8
7.3.3	Example .....	8
7.4	Use case 4 -- Mandatory operation of functional package .....	8
7.4.1	Overview .....	8
7.4.2	Description .....	8
7.4.3	Example .....	9
Bibliography .....		10
