Europeanforeword 4

9.9 Compatibility with insulation monitoring 29

10 Reverse power transfer 29
10.1 General 29
10.2 AC reverse power transfer 30
10.2.1 General 30
10.2.2 Output power quality 30
10.2.3 Prevention of disconnection of vehicle coupler under load 31
10.2.4 Protection against electrical shock 31
10.2.5 Protection against thermal incident 31
10.3 DC reverse power transfer 31
10.3.1 General 31
10.3.2 Connection to the external electric circuit 32
10.3.3 Protection against overdischarge of the RESS 32
10.3.4 Auxiliary power supply from EV (optional) 32
10.3.5 Protection against thermal incident 32

11 Operational requirements 32

12 Owner'smanualandmarking 32
12.1 Owner's manual 32
12.2 Marking 32

13 Test procedure 32
13.1 General 32
13.2 Resistance of protective conductor 33
13.3 Isolation resistance test 33
13.4 Withstand voltage test 33
13.4.1 General 33
13.4.2 Test voltage 34
13.5 Inrush current tests 34
13.5.1 General 34
13.5.2 Measurement 35
13.6 Touch current 35
13.6.1 General 35
13.6.2 AC Charging 36
13.6.3 DC charging 38
13.7 DC power transfer with maximum current 39
13.8 DC power contact over temperature 39

Annex A (informative) Y capacitance measurement 42

Bibliography 45

9 Additional requirements for DC power transfer 26
9.1 General 26
9.2 Disconnection device 26
9.3 Control pilot functions 27
9.4 Vehicle isolation resistance monitoring system 27

9.5 Locking of the vehicle connector 27
9.6 AC or DC electric power at the same contacts 27
9.7 Contact temperature 28
9.8 Overvoltage in case of a load dump 29
