

ISO/TS 15638-4:2020-02 (E)

Intelligent transport systems - Framework for cooperative telematics applications for regulated commercial freight vehicles (TARV) - Part 4: System security requirements

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	2
3	Terms and definitions	2
4	Abbreviated terms	5
5	General overview and framework	5
6	Requirements	8
6.1	Threat, vulnerability and risk analysis	8
6.2	Functional requirements for security of targets of evaluation (TOEs)	8
6.2.1	TOE -- In-vehicle systems	8
6.2.2	TOE -- Application service provider systems	8
6.2.3	TOE -- TARV data transfer	9
6.2.4	Means of TARV data transfer	9
6.2.5	TARV data security requirements	9
6.3	General specifications for the security of TARV	9
6.3.1	Destined to a predetermined IPv6 address (URI)	9
6.3.2	ASP or jurisdiction determines security requirements	10
6.4	Low security data transfers via an ITS-station	10
6.5	TARV Data transfers via an ITS-station with C-ITS security (BSMD)	10
6.5.1	Within ISO 21217 ITS-station environment	10
6.5.2	Within ISO 21210 networking environment	10
6.5.3	Within ISO 17423 selection of communications profile requirements	10
6.5.4	When accessing specific wireless media	10
6.6	TARV data transfers including defined security, but outside a BSMD	11
6.6.1	General	11
6.6.2	Security data	12
6.6.3	IVS TARV security module	12
6.7	Identity management	12
6.8	Trust and privacy management	12
6.9	Access control	12
6.10	Confidentiality services	12
6.11	Data privacy	12
6.12	Integrity of trailer identification	13
6.13	Exception handling	13
6.14	Cross-border operations and harmonization	13
7	Quality of service requirements	13
8	Test requirements	13
9	Marking, labelling and packaging	13
Annex A (informative)	Example TARV security in a regulatory domain	14
