Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 List of Acronyms 1

5 Purpose 2

6 Transition process models 2
6.1 General 2
6.2 Transition process model for system-initiated transitions 2
6.3 Transition process model for human-initiated transitions 3

7 Humanfactorsthatinfluencetakeoverperformance 4
7.1 General 4
7.2 Driver attributes 4
7.2.1 Knowledge 4
7.2.2 Experience and trust 5
7.2.3 Demographic attributes 5
7.3 Driver readiness/availability 5
7.3.1 Sitting position and posture 6
7.3.2 Engagement in non-driving related activities 6
7.3.3 Drowsiness 7
7.3.4 Mind wandering 8
7.3.5 Situation awareness 8
7.3.6 Operating state/mode awareness 9
7.3.7 Attentiveness 9
7.3.8 Receptivity 9

8 Systemfactorsthatinfluencetakeoverperformance 9
8.1 General 9
8.2 System behaviour 10
8.2.1 Type of transition 10
8.2.2 System behaviour within takeover mode 10
8.2.3 System-initiated risk mitigation strategy 10
8.2.4 System limitations and failures 11
8.2.5 Stability and reliability of the system functions 11
8.2.6 Level of automated driving to which the system shifts in transition 12
8.3 Human machine interfaces for Rtl 12
8.3.1 Design parameters for HMI 12
8.3.2 Total time budget 13
8.3.3 Other human machine interfaces to improve drivers' takeover performance 13

9 Test scenarios 13
9.1 General 13

9.2 Parameters for specifying test scenarios 14
9.3 Considerations for selecting/designing adequate test scenarios 16
9.3.1 Investigating driver state transitions during automated driving 16
9.3.2 Investigating takeover performance in non-critical transitions 16
9.3.3 Assessing takeover performance at system limits 16

10 Takeoverperformance 17
10.1 Introduction 17
10.2 Taxonomy of human performance measures 18
10.2.1 Addressed phases of transition 18
10.2.2 Suitability for transition type 19
10.2.3 Scope of assessment 20
10.2.4 Data considerations 21
10.3 Overview of measures and characteristics 22

11 Testing environments 24
11.1 General 24
11.2 Types 24
11.2.1 Simulator studies 24
11.2.2 Roadway studies 26
11.3 Advantages and disadvantages 27
11.3.1 Realism-to-safety trade-off 27
11.4 Considerations for test environment selections 29

Annex A (informative) Human machine interfaces/interactions for automated vehicles 30
