

# ISO 21111-8:2022-08 (E)

## Road vehicles - In-vehicle Ethernet - Part 8: Electrical 100-Mbit/s Ethernet transmission media, components and tests

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Abbreviated terms .....	3
5	Communication channel/link .....	4
5.1	General .....	4
5.1.1	Definition of communication channel .....	4
5.1.2	Operating temperature .....	5
5.1.3	RF parameters .....	5
5.1.4	Definition of whole communication channel .....	6
5.1.5	Definition of coupling zone .....	6
5.2	Specification of single channel characteristics for SCC, cable and connector .....	8
5.2.1	Specification of SCC in WCC configuration including assembly .....	8
5.2.2	Specification of the cable in SCC .....	9
5.2.3	Specification of the connector in SCC .....	9
5.3	Specification related to the electromagnetic interaction between SCC and ES .....	9
5.3.1	Specification of the connector .....	9
5.3.2	Specification of SCC in WCC including assembly .....	10
6	Test methods .....	10
6.1	Apparatus .....	10
6.1.1	Test equipment .....	10
6.1.2	Precautions for VNA .....	11
6.1.3	VNA setting parameter .....	11
6.2	Procedure .....	12
6.2.1	Cable .....	12
6.2.2	Connector .....	12
6.2.3	WCC .....	14
6.3	Test results .....	17
Annex A (informative)	Extended test setup definitions .....	18
Annex B (informative)	Correction method for TDR measurements .....	19
Annex C (informative)	Definitions for alien crosstalk test setup four-around-one .....	21
Bibliography .....		23
