|-----------------------|--|-------------|
| Foreword .....        |  | iv          |
| Introduction .....    |  | v           |
| 1                     | Scope .....  | 1           |
| 2                     | Normative references .....   | 1           |
| 3                     | Terms and definitions .....  | 1           |
| 4                     | Abbreviated terms .....  | 3           |
| 5                     | Communication channel/link .....   | 4           |
| 5.1                   | General .....  | 4           |
| 5.1.1                 | Definition of communication channel .....  | 4           |
| 5.1.2                 | Operating temperature .....  | 5           |
| 5.1.3                 | RF parameters .....  | 5           |
| 5.1.4                 | Definition of whole communication channel .....                                    | 6           |
| 5.1.5                 | Definition of coupling zone .....  | 6           |
| 5.2                   | Specification of single channel characteristics for SCC, cable and connector ..... | 8           |
| 5.2.1                 | Specification of SCC in WCC configuration including assembly .....                 | 8           |
| 5.2.2                 | Specification of the cable in SCC .....  | 9           |
| 5.2.3                 | Specification of the connector in SCC .....  | 9           |
| 5.3                   | Specification related to the electromagnetic interaction between SCC and ES .....  | 9           |
| 5.3.1                 | Specification of the connector .....   | 9           |
| 5.3.2                 | Specification of SCC in WCC including assembly .....                               | 10          |
| 6                     | Test methods .....   | 10          |
| 6.1                   | Apparatus .....  | 10          |
| 6.1.1                 | Test equipment .....   | 10          |
| 6.1.2                 | Precautions for VNA .....  | 11          |
| 6.1.3                 | VNA setting parameter .....  | 11          |
| 6.2                   | Procedure .....  | 12          |
| 6.2.1                 | Cable .....  | 12          |
| 6.2.2                 | Connector .....  | 12          |
| 6.2.3                 | WCC .....  | 14          |
| 6.3                   | Test results .....   | 17          |
| Annex A (informative) | Extended test setup definitions .....  | 18          |
| Annex B (informative) | Correction method for TDR measurements .....                                       | 19          |
| Annex C (informative) | Definitions for alien crosstalk test setup four-around-one .....                   | 21          |
| Bibliography .....    |  | 23          |
