

# ISO 23374-1:2023-07 (E)

## Intelligent transport systems - Automated valet parking systems (AVPS) - Part 1: System framework, requirements for automated driving and for communications interface

---

<b>Contents</b>		<b>Page</b>
Foreword .....		vi
Introduction .....		vii
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Normative references .....</b>	<b>1</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>2</b>
<b>4</b>	<b>Symbols and abbreviated terms .....</b>	<b>6</b>
4.1	Symbols .....	6
4.2	Abbreviated terms .....	7
4.2.1	Terms defined in ISO/SAE PAS 22736 .....	7
4.2.2	Terms relating to names of system and sub-systems .....	7
4.2.3	Other terms .....	7
<b>5</b>	<b>System framework .....</b>	<b>8</b>
5.1	System description .....	8
5.1.1	Basic functionalities .....	8
5.1.2	Basic flow .....	8
5.2	System configuration .....	10
5.2.1	Sub-systems .....	10
5.2.2	System architecture .....	10
5.2.3	Interface .....	10
5.3	Functional allocation .....	11
5.4	Classification .....	12
5.4.1	Vehicle operation types .....	12
5.4.2	Traffic environment categories .....	13
5.5	Human interaction .....	13
5.5.1	General .....	13
5.5.2	Service provider .....	14
5.5.3	System operator .....	14
5.5.4	Facility manager .....	14
<b>6</b>	<b>Requirements for automated vehicle operation functions .....</b>	<b>14</b>
6.1	General .....	14
6.1.1	Principles for performing automated vehicle operation .....	14
6.1.2	Relationship of the operation functions .....	15
6.1.3	Operational design domain .....	15
6.2	Requirements for DDT .....	16
6.2.1	General .....	16
6.2.2	Basic performance requirements .....	16
6.2.3	Additional requirements for operation under a mixed traffic environment .....	17
6.3	Requirements for emergency stopping .....	18
6.3.1	General .....	18
6.3.2	DDT fallback[1] .....	19
6.3.3	Response to operation stop commands .....	19
6.3.4	Detection of human activities .....	19

6.4	Requirements for destination assignment .....	19
6.4.1	General requirements .....	19
6.4.2	Type 1 systems .....	20
6.4.3	Type 2 and 3 systems .....	20
6.5	Requirements for route planning .....	20
6.6	Requirements for localization accuracy .....	20
6.6.1	Accuracy requirement relative to the digital map .....	20
6.6.2	Accuracy requirement of the end position relative to the destination .....	21
6.7	Requirements for human activity recognition .....	21
7	Requirements for management functions .....	21
7.1	Functions that influence the automated vehicle operation .....	21
7.1.1	General .....	21
7.1.2	Remote engagement .....	21
7.1.3	Operation stop .....	21
7.1.4	Remote assistance .....	22
7.1.5	Remote disengagement .....	22
7.1.6	Central control .....	22
7.2	Other management functions .....	22
7.2.1	Compatibility and occupancy check .....	22
7.2.2	SV identification .....	23
7.2.3	Response to incapacitation of the operation functions .....	23
7.2.4	Maintaining environmental conditions .....	23
8	Requirements for the environment within parking facilities .....	24
8.1	General .....	24
8.2	Common requirements .....	24
8.2.1	Operation zone .....	24
8.2.2	Drop-off and pick-up area .....	24
8.2.3	SV identification area .....	24
8.2.4	Wireless communication .....	24
8.2.5	Operation stop device .....	25
8.2.6	Lighting .....	25
8.3	Vehicle-operation-type-dependent requirements .....	26
8.3.1	Detection capabilities of the R sub-system .....	26
8.3.2	Localization markers .....	26
8.3.3	Digital maps .....	27
8.4	Traffic environment category dependent requirements .....	29
8.4.1	Mixed traffic .....	29
8.4.2	Exclusive traffic .....	29
9	Requirements for overall system operation .....	29
9.1	General .....	29
9.2	Requirements for the communication interface .....	30
9.2.1	General requirements .....	30
9.2.2	Security goals .....	31
9.2.3	Security requirements .....	31
9.3	System states and transition diagram .....	31
9.3.1	State transition diagram .....	31
9.3.2	Definition and requirements of system states .....	33
9.3.3	Transition conditions .....	36
9.4	Suspend condition codes .....	40
9.5	Object and event detection data reporting .....	41
9.6	Data recording .....	41
9.7	Information to the user .....	42
9.8	Development process and management .....	42
10	Test scenarios for automated vehicle operation .....	42
10.1	General .....	42
10.1.1	Purpose .....	42
10.1.2	Test sites .....	43

10.1.3	Environmental conditions .....	43
10.1.4	Example test setups .....	43
10.1.5	Values of each figure .....	44
10.1.6	Test targets .....	44
10.1.7	Observing designed values at a preparation run .....	45
10.1.8	Means to limit the designed values .....	45
10.1.9	Common pass criteria .....	46
10.1.10	List of test scenarios and scenes .....	46
10.2	Basic scenarios .....	47
10.2.1	Scenario A: Entering .....	47
10.2.2	Scenario B: Re-parking .....	48
10.2.3	Scenario C: Exiting .....	50
10.3	Basic scenes .....	51
10.3.1	Scene 01: Climbing a ramp at slow speed .....	51
10.3.2	Scene 02: Ramp down .....	52
10.3.3	Scene 03: Operation on spiral ramps (up/down) .....	53
10.3.4	Scene 04: Out of drop-off area .....	55
10.3.5	Scene 05: SV identification .....	55
10.3.6	Scene 06: Out of operation zone .....	56
10.4	Traffic rules and behaviours .....	57
10.4.1	Scene 11: Stopping location .....	57
10.4.2	Scene 12: Intersection passing .....	58
10.4.3	Scene 13: Blocked intersection .....	59
10.4.4	Scene 14: Give way in two-way traffic .....	60
10.4.5	Scene 15: Vehicle in front is reversing towards SV .....	61
10.5	Static object avoidance .....	62
10.5.1	Scene 21: Smallest object in the direction of travel (forward/reverse) .....	62
10.5.2	Scene 22: Overhanging object .....	64
10.5.3	Scene 23: Infant in parking spot (reverse/forward) .....	65
10.5.4	Scene 24: Infant lying near ramp (up/down) .....	66
10.5.5	Scene 25: Infant behind a curve .....	68
10.5.6	Scene 26: Infant in front of parked vehicle (forward/reverse) .....	69
10.5.7	Scene 27: Infant beside parked vehicle .....	70
10.5.8	Scene 28: Infant lying partly underneath parked vehicle .....	71
10.6	Dynamic object avoidance .....	72
10.6.1	Scene 31: Forward vehicle braking hard .....	72
10.6.2	Scene 32: Parked vehicle rushing out .....	73
10.6.3	Scene 33: Cross-cutting child .....	75
10.6.4	Scene 34: Irregular movement of an adult .....	77
10.6.5	Scene 35: Bicyclist approaching .....	79
10.7	Emergency stopping .....	80
10.7.1	Scene 41: Operation stop command .....	80
10.7.2	Scene 42: Communication failure .....	80
Annex A (normative) Communication sequences .....		81
Annex B (normative) Test targets .....		108
Annex C (informative) Description of localization markers .....		110
Annex D (informative) Guidance in placing coded markers in parking facilities .....		117
Annex E (informative) Example of line markings detectable by on-board sensors .....		123
Annex F (informative) Parking facility dimension .....		125
Annex G (informative) Examples for system implementation .....		128
Annex H (informative) Type 3 implementation example .....		129
Bibliography .....		153
